

A
CURIOUS HERBAL.

Containing
FIVE HUNDRED CUTS,
of the most useful Plants,
which are now used in the Practice of
PHYSICK.

Engraved on folio Copper Plates,
after Drawings, taken from
the LIFE.

By
Elizabeth Blackwell.

To which is added
a short Description of y^e Plants;
and
their common Uses in **PHYSICK.**

Vol: II.

Vol. 2.

Plate 253. *Avens*, or *Herb-Bennet*. *Caryophyllata*.

1. The Stalks grow about two Foot high, the Leaves are a grass Green, & y Flowers yellow.
2. It grows in Woods & Hedges, flowering great part of the Summer.
3. The Roots are accounted cephalic and alexipharmic, cordial & chearing to y Spirits, when infused in Wine. They are good for Pains arising from Cold or Wind in the Bowels, and are useful for all Kinds of Fluxes.
4. Greek, *Garofanata*. French, *Benöiste*. German, *Benedictenwurt*. Dutch, *Nägelkruyd*. Latin, *Caryophyllata vulgaris*. Spanish, *Garofanata*. Italian, *Nägelkruyd*.

Plate 254. *Bistort*, or *Snakenweed*. *Bistorta*.

1. The Stalks grow a Foot and an half high, the Leaves are a dark grass Green on the Face, and a willow Green on the Back.
2. It grows in moist Meadows, particularly Battersea, and flowers in May.
3. The Roots are esteem'd drying and binding, and useful in all Fluxes and Haemorrhagies, the Incontinence of Urine and making of bloody Water; and are serviceable in pestilential Fevers.
4. Greek, *Bistorta*. Latin, *Bistorta radice minus intorta*. Spanish, *Bistorta*. French, *La Bistorte*. German, *Ratterwurt*. Dutch, *Waternwortel*. Italian, *Bistorta*.

Plate 255. *Creeping Birthwort*. *Aristolochia clematitis*

1. The Stalks grow about two Foot high, the Leaves are a yellow grass Green, and the Flowers a dull Yellow.
2. It is a native of Spain and Italy, and flowers here in May.
3. The Roots are accounted opening and attenuating, good to cleanse the Stomach and Lungs of tough Phlegm, promote the Menses, the Lochia, and the Birth.
4. Greek, *Ἀριστολόχια Κληματίτιδα*. Latin, *Aristolochia clematitis recta*. Spanish, *Astronomia*. Italian, *Aristolochia*. French, *Aristolochie*. German, *Osterlucen*. Dutch, *Lange en dunne Holwortel*.

Plate 256. *Round Birthwort*. *Aristolochia rotunda*.

1. The Stalks of this grow less than the former, the Leaves are like the other, and the Flowers a deep Purple.
2. It grows in the same Countries, and flowers here in May.
3. The Root is esteem'd good to purge choleric and phlegmatic Humors, provoke the Catamenia, force away the Birth and After-Birth, and ease the after-Pains. Outwardly it is good to draw out Splinters and broken Bones, and Heal foul eating Ulcers.
4. Greek, *Ἀριστολόχια σπογγύλλω*. Latin, *Aristolochia rotunda flore ex purpura nigro*. Spanish, *Astronomia*. Italian, *Aristolochia*. French, *Aristolochie*. German, *Holwurt*. Dutch, *Ronde Holwortel*.

Plate 261. *Bastard Acorus. Acorus adulterinus.*

1. The Stalks grow to be three or four Foot high, the Leaves are a grass Green, and the Flowers Yellow.
2. It grows in Ditches and watery Places flowering in May & June.
3. The Roots are accounted restringent, drying and binding, good in all kinds of Fluxes. Some commend them as good to strengthen the Brain and Nerves.
4. Greek, Ψευδοάκορον. Latin, Pseudo-Acorus, & Gladiolus luteus. Spanish, Italian, Giglio giallo. French, Flambe de Rivières. German, Geel Schwertel. Dutch, Geele Lisch.

Plate 262. *Rhapontic. Rhaponticum.*

1. The Stalk grows about three Foot high, the Leaves are a deep grass Green, and the Flowers whitish.
2. It is planted in Gardens and flowers in May.
3. The Root purges less than that of the true Rhubarb; but is accounted more restringent, and good in Fluxes, Spitting of Blood, making of Bloody Water, and Weakness of the Stomach. It is one of the Ingredients in the Theriaca Andromachi.
4. Greek, Latin, Lapathum praestantissimum, Rhubarbarum officinarum dictum. Spanish, Italian, French, German, Dutch.

Plate 263. *Navelwort. Cotyledon.*

1. The Stalk grows about a Foot high, the Leaves are a light grass Green and the Flowers a whitish Green.
2. It grows upon old Stone Walls and Buildings, flowering in May.
3. The Leaves are esteemed cooling & moistning good in Diseases of the Liver, provoking Urine & taking off the sharpness of it. Outwardly applied, the Juice helps the Shingles, St. Anthony's Fire, the Pain and Inflammation of the Piles; & eases Kibes & Chulblains. It is an Ingredient in the Unguentum Populeon. The Herb Folks too frequently impose the Frog-bit and the Marsh Pennywort, neither of which are used in the Shops, upon their unwary Customers instead of this Plant.
4. Greek, Κοτυλιδών. ἡδὲ κυρβέλιον. Latin, Umbilicus Veneris. Spanish, Scudettes. Italian, Bellico di Venere. French, Escudes, German, Nabel Graut. Dutch, Navelkruid.

Plate 264. *Godt's-thorn. Tragacantha.*

1. This Plant rarely comes to any considerable Height here, the Leaves are a blue Green & the Flowers white.
 2. It grows in the Southern Parts of France and Italy, but produces its Gum in the more Eastern Countries.
 3. The Gum Dragon of the Shops comes from the Root of this Plant, being of a glutinous Nature, good to correct the Acrimony & Sharpness of Humours, easing Coughs, Hoarseness, and Catarrhus Defluxions. Outwardly it is used in Collyriums for hot inflam'd Eyes.
 4. Greek, Τραγάκανθα. Latin, Tragacantha. Spanish, Aguetira. Italian, Tragacantha. French, Barbe Renard. German, Dragan. Dutch, Gum Dragon Boom.

Plate 265. *Staves-acre. Staphis agria.*

1. The Stalks grow about two Foot high, the Leaves are a deep Green, and the Flowers a blue Purple.
2. It is a native of Italy, and flowers here in June.
3. The Seed powdered is commended, by Sylvius de la Boe, from gr^{XII} to a Scruple in a Dose, to purge upwards & downwards, and cause a great Flux of Spittle, being serviceable against the Lues Venerea. Some use it in Gargarisms for the Tooth-Ach; and the Vulgar use it to kill Lice; from which it has the Name of Lousewort.
4. Greek, Σταφίς αγγία. Latin, *Staphis agria*. Spanish, *Fabaraz*. Italian, *Stafusaria*. French, *Herbe aux Poux*. German, *Bismunk*. Dutch, *Luydkruyd*.

Plate 266. *Wild Rocket. Eruca sylvestris.*

1. The Stalks grow about two Foot high, the Leaves are a light grass Green, and the Flowers yellow.
2. It grows upon old Walls, as on the Walls of the City of London, and flowers several Months in the Summer.
3. The Whole Plant is accounted hot, dry, and diuretic, & a provocative to Venery. Matthiolus prefers this before y^e Garden Rocket. See Plate 242.
4. Greek, ἑρῦον αγγιον. Latin, *Eruca sylvestris major lutea caule aspero*. Spanish, *Arugua*. Italian, *Rucola salvatica*. French, *Roquette sauvage*. German, *Wild Weiß Scuff*. Dutch, *Bilde Rakette*.

Plate 267. *Sassafras. Sassafras.*

1. This grows to be a large Tree in the West Indies, the Leaves are a grass Green and the Flowers yellow.
2. It is a native of Virginia, and flowers here in April.
3. The Root and Bark are accounted heating and drying, good for the Scurvy, Gout and Dropsy, and are commonly an Ingredient in Dyet Drinks for the Lues Venerea. The Tea made of the shavings is much drank for catarrhus Destuptions and shortness of Breath. The Official Preparations are the Electuarium e Sassafras & the Chymical Oil.
4. Greek, Latin, *Arbor ex Florida Ficulneo folio*. Spanish, Italian, French, German, Dutch.

Plate 268. *Spatling Poppy. Behen album.*

1. The Stalks grow about two Foot high, the Leaves are a blue Green, and the Flowers white.
2. It grows in Meddows & Corn Fields, flowering in June.
3. The Root is esteemed cordial, cephalic, alexipharmic, and a Provocative to Venery.
4. Greek, Αὐχρὶς αγγία. Latin, *Lychnis sylvestris*. Spanish, Italian, *Lichnide coronaria*. French, German, *Margenrosin*. Dutch, *Witte Been*.

Plate 269. *Dragons. Dracontium.*

1. The Stalk grows near three Foot high, the Leaves are a shining grass Green, and the Flowers green on the outside and Purple within.
 2. It is planted here in Gardens, and flowers in June.
 3. This Plant is accounted alexipharmic, good in malignant contagious Distempers, and pestilential Fevers; and is very useful to drive any thing out from the Heart, for which it is given in the small Pox & Measles.
 4. Greek, Δρακοντία μικρά. Latin, *Dracunculus polyphyllus*. Spanish, Taragontia. Italian, Dragontea. French, Petite Serpentaire. German, Groß Schlangencraut. Dutch, Dragon.
-

Plate 270. *Small Blue-Bottle. Cyanus minor.*

1. It grows near two Foot high, the Leaves are a willow Green, and the Flowers a fine Blue.
 2. It grows amongst the corn, and flowers in June & July.
 3. The Leaves and Flowers are said to have the same Vertues as those of the great Blue-Bottle. see Plate 66. - Some commend the Distill'd Water of the Flowers for sore, inflam'd, and bloodshot Eyes. The Infusion and Powder of the Flowers, are given as a Remedy against the Jaundice.
 4. Greek, Κύανος μικρός. Latin, *Cyanus segetum*. Spanish, Italian, Fior minore. French, German, Kornblum. Dutch, Koorn-bloem.
-

Plate 271. *Wild Valerian. Valeriana sylvestris.*

1. The Stalks grow about three Foot high, the Leaves are a bright grass Green, and the Flowers a pale Red.
 2. It grows in Woods, flowering in May and June.
 3. This Plant is much used for Diseases of the Head and all nervine Affections. Columna commends the Powder of the Root as good for the Epilepsy. Some Physicians prescribe Tea made from the Roots, as a good Medicine for $\frac{1}{2}$ above mention'd Distemper, after proper Evacuations.
 4. Greek, Φού μικρόν. Latin, *Valeriana sylvestris major, foliis angustioribus*. Spanish, Yerva benedicta. Italian, Valeriana minore. French, Valerienne des prez. German, Gemein Baldrian. Dutch, Weild Valeriana.
-

Plate 272. *Golden Starnwort. Aster Atticus luteus.*

1. It grows about a Foot and an half high, the Leaves are a dull grass Green, and the Flowers yellow.
2. It is a Native of Italy and Spain, and is planted here in Gardens flowering in June.
3. The Ancients held this Plant in great Esteem for Buboës & swellings in the Groin, the Leaves being applyed as a Cataplasma; and affirm that holding them only in the Hand will dissipate those Swellings, which is hardly to be credited.
4. Greek, Ἀστὴρ Ἀττικὸς ὑπωκρός. Latin, *Aster luteus, foliolis ad florem rigidis*. Spanish, Italian, Asteratico. French, Petit Mugue. German, Stern Kraut. Dutch,

The first of these is the fact that the
 Government has been unable to secure
 the necessary funds to carry out its
 policy of non-interference. This is
 due to the fact that the Government
 has been unable to secure the necessary
 funds to carry out its policy of non-
 interference. This is due to the fact
 that the Government has been unable
 to secure the necessary funds to carry
 out its policy of non-interference.

The following is a list of the names of the persons who have been
 named in the above report, in the order in which they were
 named:

Plate 273. *Clown's-allheal. Panax Coloni.*

1. The Stalks grow about three Foot high; the Leaves are a deep grass Green, and the Flowers a red Purple.
 2. It grows in Ditches and watery Places, flowering in June.
 3. Gerard gives this Plant great Commendations for a good vulnerary, to cure all green Wounds, beaten to a Cataplasm, with Hogs Lard. Some commend it for all kinds of Haemorrhagies.
 4. Greek, Σταχύς. Latin, *Stachys palustris foetida*. Spanish, Italian,
Stachi. French German, Dutch,
-

Plate 274. *Female Pimpernell. Anagallis terrestris foemina.*

1. The stalks grow near a Foot high, the Leaves are a blue Green, and the Flowers blue.
 2. It grows in some Corn Fields, and flowers in June.
 3. This Plant has much the same Vertues with the other: see Plate 43. being accounted a good vulnerary and useful in Consumptions and malignant Distempers &c.
 4. Greek, Αἰνυλλίς θήλυς. Latin, *Anagallis coeruleo flore*. Spanish, Murugues.
Italian, Anagallo foemi. French, Mouron. German, Gauchbeyl weible. Dutch
-

Plate 275. *Lovage. Levisticum.*

1. The stalks grow about four Foot high, the Leaves are a bright grass Green, and the Flowers yellow.
 2. It is sow'd here in Gardens, and flowers in June.
 3. The Roots, Leaves and Seed are esteem'd heating and drying, good to warm the Stomach, expel Wind, provoke Urine and the Menses; and are useful in Agues and Pestilential Distempers.
 4. Greek, Ιώωσσελίον. Latin, *Ligusticum vulgare*. Spanish,
Italian, Levistico. French, Achelarge. German, Liebstockel. Dutch, Lavas.
-

Plate 276. *Sneezwort. Ptarmica.*

1. The Stalks grow about a Foot high, the Leaves are a grass Green and the Flowers white with a yellow Umbel in the Middle.
2. It grows in moist Meadows, flowering in June and July.
3. This Plant is used in Sallads to correct the Coldness of other Herbs; The Roots held in the Mouth, are said to ease the Tooth-Ach, by evacuating the Rheum, like Pellitory of Spain. - The Powder of the Herb snuff'd up the Nose provokes Sneezing and cleanses the Head of tough slimy Humours.
4. Greek, Πταρμικη. Latin, *Dracunculus pratensis, serrato folio*.
Spanish, Italian, Ptarmica. French,
German, Dorant. Dutch,

1. The first part of the paper is devoted to a general
discussion of the subject. It is shown that the
theory of the subject is not yet fully developed,
and that there is a need for further research.
The author then proceeds to a detailed
analysis of the problem, and shows that the
theory is not yet fully developed, and that there
is a need for further research.

2. The second part of the paper is devoted to a
detailed analysis of the problem. It is shown that
the theory is not yet fully developed, and that
there is a need for further research. The author
then proceeds to a detailed analysis of the
problem, and shows that the theory is not yet
fully developed, and that there is a need for
further research.

3. The third part of the paper is devoted to a
detailed analysis of the problem. It is shown that
the theory is not yet fully developed, and that
there is a need for further research. The author
then proceeds to a detailed analysis of the
problem, and shows that the theory is not yet
fully developed, and that there is a need for
further research.

4. The fourth part of the paper is devoted to a
detailed analysis of the problem. It is shown that
the theory is not yet fully developed, and that
there is a need for further research. The author
then proceeds to a detailed analysis of the
problem, and shows that the theory is not yet
fully developed, and that there is a need for
further research.

1. This Bush grows about four Foot high, the Leaves are a deep Green, and the Flowers a pale Green; & y^e Berries are of various Colours as red and Green.
2. It is planted in Gardens flowering in March and April.
3. The Berries are esteem'd cooling and restraining; good to create an Appetite and quench Thirst.
4. Greek, *Uva crispa.* Latin, *Uva crispa.* Spanish, *Uva spina.* French, *Groiselier.* German, *Greukbeer.* Dutch, *Kruys Besien.* Italian,

Plate 278. *Loosestrife. Lysimachia.*

1. The Stalks grow about two Foot high, the Leaves are a dull yellow Green, and the Flowers yellow.
2. It grows in watery Places by River, Sides, flowering in June & July.
3. The Ancients commend it for a great restraining, good for all kinds of Fluxes, as also to consolidate y^e Lips of fresh Wounds, and heal them.
4. Greek, *Λυσιμαχίων.* Latin, *Lysimachia lutea major.* Spanish, *Lisimachia.* French, *Gell-Beiderich.* Dutch, *German,*

Plate 279. *Master-wort. Imperatoria.*

1. The Stalks grow about a Foot high, the Leaves are a bright grass Green, and the Flowers white.
2. It is a Native of the Austrian and Stirian Mountains and flowers here in June and July.
3. The Roots are esteem'd cordial, Sudorific & Maxipharmic of great Service in malignant Fevers, and all nervine Affections & Disorders of the Head; they are used to ease y^e Pains of the Stomach & Collick.
4. Greek, *Astrantia.* Latin, *Astrantia.* Spanish, *Imperatoria.* French, *Imperatoire.* German, *Meisternwurk.* Dutch, *Meesternvortel.*

Plate 280. *Wild Marjorum. Origanum.*

1. It grows about a Foot high, the Leaves are a dull Green, and the Flowers a pale Purple.
2. It grows in Hedges and flowers in June and July.
3. It is accounted good for Obstructions of the Liver, Breast & Womb; helping the Jaundice, shortness of Breath & stoppage of the Menses. It comforts the Head & Nerves; and the distill'd Oil helps y^e Tooth-Ach, being put upon Lint into the aking Tooth.
4. Greek, *Ὠρίανον.* Latin, *Origanum sylvestre.* Spanish, *Oreganos.* Italian, *Origano.* French, *Origan.* German, *Gemeiner Wölgemut.* Dutch, *Orego.*

1870
The first of the year was a very
cold one, and the weather was
very disagreeable. The snow
was very deep, and the wind
was very strong. The people
were very much distressed,
and the cattle were very
suffering.

The second of the year was a
very warm one, and the weather
was very pleasant. The snow
was very shallow, and the wind
was very light. The people
were very much pleased,
and the cattle were very
thriving.

The third of the year was a
very cold one, and the weather
was very disagreeable. The snow
was very deep, and the wind
was very strong. The people
were very much distressed,
and the cattle were very
suffering.

The fourth of the year was a
very warm one, and the weather
was very pleasant. The snow
was very shallow, and the wind
was very light. The people
were very much pleased,
and the cattle were very

Plate 281. *Apricock. Armeniaca.*

1. This Tree grows to a good Bigness in its Native Country, the Leaves are a grass Green, and the Flowers white.
2. It is planted here in Gardens, and flowers in March & April.
3. Apricocks are pleasant & grateful to the Stomach, y^e Kernels infused in Brandy make the famous Cordial call'd Ratafia.
4. Greek, *Μήλα ἀγριανὰ*. Latin, *Mala Armeniaca*, or *Praecotia*. Spanish, *Albricoques*. Italian, *Armeniache*. French, *Alricoz*. German, *S. Johannis Pfirsich*. Dutch,

Plate 282. *Lupin. Lupinus.*

1. The Stalk of the Lupin is hairy; the Leaves are a light grass Green, and the Flowers whitish.
2. They are sown in Gardens, and flower in June.
3. The Seed is esteem'd opening and cleansing, good to destroy Worms, bring down the Menses, and expell the Birth & Secundines. Outwardly they are used against Deformities of the Skin, scabby Ulcers scald Heads and other cutaneous Distempers.
4. Greek, *Θέου*. Latin, *Lupinus sativus*, flore albo. Spanish, *Entramuces*. Italian, *Lupino*. French, *Lupins*. German, *Weiss Feigbonen*. Dutch, *Lupinen*.

Plate 283. *Would or Dyer's Weed. Luteola.*

1. It grows about a Yard high, the Leaves are a pale Green, and the Flowers yellow.
2. It grows on Dry Banks and flowers in June.
3. Some think this the *Struthium* of Dioscorides, and account it a good Wound Herb; and of great Service in y^e King's Evil, The Herb Women sell this for Woad.
4. Greek, *Χυμύνη*. Latin, *Luteola*. Spanish, Italian, French, German, *Streitraut*. Dutch

Plate 284. *Sweet Trefoil. Lotus Urbana.*

1. It grows about two Foot high, the Leaves are a light grass Green, and the Flowers a pale Blue.
2. It grows in Gardens, and flowers in June.
3. Some prefer a Plaister of this to Melilot, to keep down Inflammations in Wounds, cleanse foul & ordid Ulcers, & dissolve hard Swellings. Galen accounts the Seed diuretic and alexipharmic.
4. Greek, *Λότος ἡμερος*. Latin, *Trifolium Odoratum*. Spanish, Italian, *Trifoglio cavallino*. French, German, *Steintlee*. Dutch, *Seven Getyndenkruyd*.

1. The first thing I noticed when I stepped
out of the plane was the cold. It was a
sharp contrast to the warm air of the
tropical island. I had heard that the
weather was perfect, but I didn't realize
how cold it would be. I was wearing a
light shirt and shorts, and I was
shivering. I had to buy a heavy jacket
at the airport. I was also surprised by
the humidity. It was a warm blanket
that I didn't want to take off.

2. The second thing I noticed was the
beach. It was a beautiful stretch of
white sand and turquoise water. I had
heard that the beach was the best, and
it was. I had never seen a beach like
this before. The water was so clear that
I could see the bottom. The sand was
so soft that I could walk on it without
feeling anything. I had heard that the
beach was the best, and it was.

3. The third thing I noticed was the
people. They were so friendly and
welcoming. I had heard that the
people were nice, but I didn't realize
how friendly they would be. I was
treated like a king. I had heard that
the people were nice, but I didn't realize
how friendly they would be. I was
treated like a king. I had heard that
the people were nice, but I didn't realize
how friendly they would be. I was
treated like a king.

4. The fourth thing I noticed was the
food. It was so delicious and fresh.
I had heard that the food was good, but
I didn't realize how delicious it would
be. I had never tasted anything like
this before. The food was so fresh that
I could taste the ocean. I had heard
that the food was good, but I didn't
realize how delicious it would be. I
had never tasted anything like this
before. The food was so fresh that I
could taste the ocean.

Plate 285. *Red Currans. Ribes.*

1. It grows to be five or six Foot high; the Leaves are a dark grass Green, & the Flowers a very light Green.
2. It is planted in Gardens, and flowers in April.
3. Currans are accounted cooling and grateful to the Stomach, good to quench Thirst, & are somewhat restraining. A Jelly made of the Juice and Sugar is cooling and good in Fevers.
4. Greek, *Λαγυρία*. Latin, *Ribes*, & *Grossularia non Spinos*. Spanish, *Treublein*. Dutch, *Roo de Alhesien*.

Plate 286. *Herb Paris. Herba Paris.*

1. The Stalks grow about eight Inches high, the Leaves are a deep grass Green, & the Flowers a light Green with yellow Stamina.
2. It grows in moist shady Woods, particularly in a Wood, by the Bog at Chiselhurst in Kent; at the Entrance of it next the Town. It flowers in April and May, and the Berry is ripe in July.
3. Fuchsius accounted this Plant of a poisonous Nature; but later Writers esteem it a counter Poison, and alexipharmic, good in malignant and pestilential Fevers. Parkinson says the Roots boild in Wine help the collic; and the Leaves applyed outwardly, repress Tumours and Inflammations especially in the Scrotum and Testicles.
4. Greek, *Παραχάριον*. Latin, *Solanum quadrifolium bacciferum*. Spanish, *German*, *Sternkraut*. Dutch,

Plate 287. *Purslain. Portulaca.*

1. The Stalk grows near a Foot high, the Leaves are a reddish Green, and the Flowers yellow.
2. It is sown in Gardens, and flowers in July.
3. The Leaves are esteem'd cooling, good for the Scurvy, the Heat of the Bile, Heat of Urine, Strangury, and a Gonorrhoea. The Seed is cooling and restraining, good to kill Worms.
4. Greek, *Αρδύαχνη*. Latin, *Portulaca latifolia, seu sativa*. Spanish, *Verdolagas*. Italian, *Porcellana*. French, *Porcelaine*. German *Barkelkraut*. Dutch, *Porceleyn*.

Plate 288. *Fennel. Foeniculum.*

1. The Stalks grow about three or four Foot high, the Leaves are a dark Green, and the Flowers yellow.
2. It is commonly planted in Gardens, flowering in June; but it grows wild between Woolwich and Gravesend.
3. The Root is accounted aperitive & diuretic, opening Obstructions of the Liver, Spleen, & Kidneys, provoking Urine & Menses, helping the Dropsy & Jaundice; boild in Water Gruel & drank in a Morning. The Leaves are said to encrease Nurses Milk & strengthen the Sight, and are good for the Stone and Gravel. The Seed is carminative, expelling Wind, strengthening the Bowels and helping the Collic. Officinal Preparations are, a Simple Water from the Leaves, and a Distill'd Oil from the Seeds.
4. Greek, *Μάραθρον*. Latin, *Foeniculum vulgare Germanicum*. Spanish, *Funco*. Italian, *Finochio*. French, *Fenoel*. German, *Fenchell*. Dutch, *Denkel*.

Plate 289. Raspberry-bush. *Rubus Idoeus*.

1. It grows to be four or five Foot high; the Leaves are a deep Green above & hoary underneath, & the Flower a pale Red.
 2. It grows wild in some Parts of Wales, and the North of England; and flowers in May, the Fruit being ripe in June and July.
 3. The Fruit is accounted cordial, good to strengthen the Stomach, stay Vomiting, and prevent Miscarriage. The Officinal Preparation is the Syrupus de Idoeo.
 4. Greek, Βάτος ἰδαία. Latin, *Rubus Idoeus spinosus*. Spanish, Italian, Rovomontano. French, German, Boctsheer. Dutch, Bramboosen.
-

Plate 290. Mint. *Mentha*

1. The Stalks grow to be two Foot high in rich Ground; the Leaves are a yellow green, and the Flowers a pale Purple.
 2. It is planted in Gardens, and flowers in July.
 3. This Plant is esteem'd good for all Disorders of the Stomach, a Gonorrhoea, the Fluor albus, & the immoderate Flux of the Menses. Officinal Preparations are, a Simple Water and Spirit, a Compound Syrup and a Distill'd Oil.
 4. Greek, ἡδύοσμον. Latin, *Mentha angustifolia spicata*. Spanish, Ortelana. Italian, Menta. French, Mente. German, Munt. Dutch, Harte Munte.
-

Plate 291. Pepper-mint. *Mentha Piperis sapore*.

1. The Stalks grow about two Foot high, the Leaves are a grass Green, and the Flowers a pale Purple.
 2. It grows wild in Hertfordshire and Essex, and flowers in July.
 3. It is accounted by some an excellent Remedy against the Stone and Gravel, which seems to be very probable; for besides its hot biting Taste, it has a nitrous one.
 4. Greek, Latin, *Mentha Piperis sapore*. Spanish, Ortelana pimenta. Italian, Menta minore. French, German, Dutch, Kruysmunte.
-

Plate 292. Horse-mint. *Menthastrum*.

1. It grows about a Foot high, the Leaves are a dull Green above and hoary underneath, and the Flowers purple.
2. It grows near watery Places, and flowers in July.
3. It is esteem'd good for the Wind and Colic in the Stomach, to procure the Menses, and expell the Birch & Secundines, being an Ingredient in the Trochisci de Myrrha; much used in those Cases.
4. Greek, ἡδύοσμον ἄγριον. Latin, *Mentha sylvestris longiore folio*. Spanish, Ortelana cavallo. Italian, Mentastro. French, Mente à cheveau. German, Bild Munt. Dutch, Wilde Munt.

Plate 294. *Lavender. Lavendula.*

1. It grows about two Foot high, the Leaves are a light Green, and the Flowers bluish.
 2. It grows wild in the Southern Parts of France and Spain, and is planted here in Gardens, flowering in July.
 3. Lavender is esteem'd cordial and cephalic, good for all Diseases of the Head and Nerves. It is also good to expell Wind from the Stomach and Bowels, and prevent the Colic. Outwardly it is used in Warming and strengthening Fomentations.
 4. Greek, Latin, *Lavendula angustifolia*. Spanish, Italian, *Lavanda*. French, *Lavande*. German, *Lavendel*. Dutch, *Lavendel*.
-

Plate 295. *Lavender-Spike. Spica.*

1. It grows about four Foot high, the Leaves are a light Green, and the Flowers bluish.
 2. It is a Native of the warm Countries, and is planted here in Gardens, flowering in July.
 3. Its Vertues are much the same as the small leaved; but it is seldome used in the Shops when they have the other.
 4. Greek, Latin, *Lavendula latifolia*. Spanish, Italian, *Spigo*. French, *Aspic*. German, *Lavendel*. Dutch, *Lavendel*.
-

Plate 296. *Hyssop. Hyssopus.*

1. It grows about a Foot high, the Leaves are a grass Green, and the Flowers a fine Blue.
2. It is sown here in Gardens, and flowers in July.
3. It is accounted healing, opening and attenuating, good to cleanse the Lungs of tartarous Humors; and ease all Diseases of the Head and Nerves. The Herb bruised is famous to take black and blue Marks out of the Skin. The Officinal Preparation is, the Simple Water.
4. Greek, *Ιαρω*. Latin, *Hyssopus officinarum coerulea sive spicata*. Spanish, *Hyssopo hierba*. Italian, *Hyssopo*. French, *Hyssope*. German, *Hyssop*. Dutch, *Hyssoop*.

Plate 305. *The Damson Tree. Prunus Damascena.*

1. This Tree seldome grows to any great Height here; the Leaves are a deep Green, & the Flowers white with yellow Stamina.
 2. It grows wild in several Parts of England & flowers in April.
 3. The Fruit is used at Table more than in the Apothecary's Shops; & are given to Persons in Fevers to cool them.
 4. Greek, Κокκύνθη. Latin, *Prunus Damascena*. Spanish, *Prunas*. Italian, *Pruno susino*. French, *Arbor Prunier*. German, *Pflaumen*. Dutch, *Pruyn Boom*.
-

Plate 306. *French Sorrel. Acetosa Romana rotundifolia.*

1. The Stalks grow about a Foot high, the Leaves are a bluish Green, and the Flowers yellow.
 2. It is sown in Gardens, and flowers in June.
 3. The Leaves are cooling & cordial, resisting Putrefaction, and are good in Fevers, and the Scurvy; for which last they are commended to be eat in Salads.
 4. Greek, Οξάρις. Latin, *Acetosa rotundifolia hortensis*. Spanish, *Azedas*. Italian, *Acetosa romana*. French, *Salicette*. German, *Sauer Ampffer*. Dutch, *Ronde Suring*.
-

Plate 307. *Sheeps Sorrel. Acetosa arvensis.*

1. It grows about eight Inches high, the Leaves are a grass Green, and the Flowers reddish.
 2. It is found in dry barren Soils, flowering in May.
 3. It is esteem'd good to allay Thirst and repress Bile in Fevers; having much the same Vertues as the common Sorrel, but in a less Degree.
 4. Greek, Οξάρις μικρά. Latin, *Acetosa arvensis, lanceolata*. Spanish, *Agrelles*. Italian, *Acetosella*. French, *Petite Oseille*. German, *Schopsampffer*. Dutch, *Schaaps Suuringh*.
-

Plate 308. *Wood-Sorrel. Luzula.*

1. The Stalks grow about six Inches high, the Leaves are a pale grass Green, and the Flowers of some are white & others Purple.
2. It grows in Woods and Shady Places, flowering in May.
3. The Leaves are said to excell the common Sorrel in its Physical Vertues; and are reckon'd more cordial & useful in all Inflammatory Fevers. Officinal Preparations are, a Syrup of the Juice, and a Conserve of the Leaves.
4. Greek, Οξυς. Latin, *Acetosella & Alleluja*. Spanish, Italian, *Trifoglio acetoso*. French, German, *Sauvrtlee*. Dutch, *Klaver Suuring*.

The first of these is the fact that the
 Government has been unable to secure
 the necessary funds to carry out its
 policy of non-interference. This is
 due to the fact that the Government
 has been unable to secure the necessary
 funds to carry out its policy of non-
 interference. This is due to the fact
 that the Government has been unable
 to secure the necessary funds to carry
 out its policy of non-interference.

[Faint, illegible handwritten text]

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a textured appearance with numerous small dark spots, possibly foxing or dirt, scattered across its surface. There are also faint, illegible markings and smudges, particularly towards the bottom and right edges, which may be remnants of text or ink from another page. The overall tone is off-white or light beige.

Plate 309. *Vervain= Mallow. Alcea.*

1. The Stalks grow about two Foot high, the Leaves are a grass Green, and the Flowers a pale Red.
 2. It grows in Hedges, & flowers the greatest part of the Summer.
 3. This Mallow is said to have the same Vertues as the common, (See Plate 22.) Dioscorides commends a Decoction of the Root in Wine, or Water, for those who are bursten, and for the bloody Flux.
 4. Greek, *Αλκαία*. Latin, *Alcea vulgaris major*. Spanish, *Malva montesina*. Italian, *Malvarisco salvatico*. French, *Guimauve sauvage*. German, *Sigmarskraut*. Dutch, *Signaarts kruid*.
-

Plate 310. *Wild Rue. Harmel*

1. It grows near two Foot high, the Leaves are a deep Green, and the Flowers whitish.
 2. It is a Native of the Eastern Countries, & flowers here in July & August
 3. This Rue is said to partake much of the Nature of the Garden Rue (See Plate 7.) and to be particularly good for Diseases arising from Melancholy, and to provoke Urine.
 4. Greek, *Πριον αγγιον, & Αρμολα*. Latin, *Ruta sylvestris*. Spanish, *Aruda montesina*. Italian, *Ruta salvatica*. French, *Rut sauvage*. German, *Bild Rauten*. Dutch, *Wilde Myrreuyt*.
-

Plate 311. *English=Mercury. Mercurialis.*

1. The Stalks grow about a Foot high, the Leaves are a yellow Green, and the Flowers Green.
 2. It grows in waste Places and amongst Rubbish, flowering for several Months in the Summer.
 3. This Plant is accounted detersive and deansing, particularly the young Shoots, boiled as Spinage, are good for the Scurvy & to provoke Urine. It is much used in Glysters, and as a Cataplasm for the Gout. It is one of y^e five Emollient Herbs. The Official Preparation is y^e *Mel Mercuriale*.
 4. Greek, *Βόνη*. Latin, *Bonus Henricus. Tota bona. Lapachum unctuosum, folio triangulo*. Spanish, *Herba inferinata*. French, *Schmerbel*. Dutch, *Goede Henderik*.
-

Plate 312. *Sciatica= Cress. Iberis.*

1. It grows about a Foot high, the Leaves are a grass Green, and the Flowers white.
2. It grows wild in the Hot Countries, but is planted here in Gardens, and flowers in June.
3. The Leaves & Roots are commended by the Ancients for the Sciatica, being beaten into a Cataplasm with Hogs Lard & applyed to the Part affected, and kept on four Hours to a Man and two to a Woman, and the Place afterwards wash'd with Wine and Oil.
4. Greek, *Ιβέρης καρδαμυτάρη*. Latin, *Iberis latiore folio*. Spanish, *Nasturtio montesino*. Italian, *Iberide*. French, *Chasserage*. German, *Bilder Cress*. Dutch, *No. 78.*

Plate 317. *Flower Gentle. Amaranthus*

1. The Stalks grow to be three Foot high, the Leaves are a bright Green tinged with Red, and the Flowers Red.
2. It is sown in Gardens, and flowers in July.
3. The Flowers are accounted cooling, drying and restringent, and from their Colour are supposed to be good to stop Bleedings and Fluxes of all Kinds.
4. Greek, *Αμαράνθος*. Latin, *Flos Amoris*. Spanish, Italian, *Amaranto*. French, *Passe Velours*. German, *Sammat Blum*. Dutch,

Plate 318. *Winter Savory. Satureia durior.*

1. It grows about eight Inches high, the Leaves are a grass Green, and the Flowers a pale Red.
2. It is planted in Gardens, and flowers in June and July.
3. This Plant is esteem'd heating, drying and carminative, good to expell Wind from the Stomach and Bowels, ease the Asthma and Affections of the Breast, open Obstructions of the Womb, and promote the Menses. This Plant is more used in the Kitchen than the Garden Savory.
4. Greek, *Θυψγα*. Latin, *Thymbra*. Spanish, Italian, *Coriella*. French, German, *Saturon*. Dutch,

Plate 319. *Sweet Marjoram. Majorana.*

1. The Stalks grow about a Foot high, the Leaves are a light grass Green, and the Flowers white.
2. It is sown in Gardens, and flowers in July.
3. It is accounted good for all Distempers of the Head and Nerves, and opens Obstructions of the Liver and Spleen, & brings down the Catamenia. Outwardly it is used in Sweet Bags & Powders, and is an Ingredient in cephalic Snuffs.
4. Greek, *Σάμυκος*, & *Αμαράνθος*. Latin, *Sampsuchus* & *Amaracus*. Spanish, *Majorana*. Italian, *Majorana*. French, *Marjolaine*. German, *Meyeran*. Dutch,

Plate 320. *Rupture Wort. Herniaria.*

1. The Stalks grow about a Span long, the Leaves are a grass Green, and the Flowers a yellow Green.
2. It grows in Sandy Ground and flowers in July.
3. It is accounted cooling, drying and binding, and a Specific for Ruptures of all Kinds. Some commend it as good for the Stone, in the Kidneys, and Bladder.
4. Greek, *Πολύγονον μικρόν*. Latin, *Polygonum minus*. Spanish, *Corriola menor*. Italian, *Correggiola minore*. French, *Correggiola*. German, *Beygrass*. Dutch,

Plate 321. *The Roman Nettle. Urtica Romana.*

1. It grows about a Foot & an half high; the Leaves are a deep grass Green, and the Flowers a dull yellow.
2. It grows frequently about Yarmouth and Romney Marsh, and flowers in July.
3. This is much of the Nature of the common Nettle, see Plate 19. but the Seed is accounted a better Pectoral, and of greater Service against Coughs and Affections of the Lungs.
4. Greek, Ακαύων. Latin, *Urtica urens*, *pilulas ferens*. Spanish, *Ortiga*. Italian, *Ortica*. French, *Ortie*. German, *Romisch Nessel*. Dutch, *Roomse Nettelen*.

Plate 322. *The Female Hemp. Cannabis foemina.*

1. The Stalks grow about five Foot high, the Leaves are a deep Green above and a light Green underneath.
2. It is planted in Fields and Gardens yearly, & produces its Seed in August; for this Species of Hemp never bears any visible Flower.
3. The Seed being boild in Milk, till it cracks, is accounted good for old Coughs, and a Specific to cure the Jaundice.
4. Greek, Καρυάβις. Latin, *Cannabis*. Spanish, *Canamho*. Italian, *Canapo*. French, *Chanvre*. German, *Hanff*. Dutch, *Hennipf*.

Plate 323. *Male Fearn. Filix mas.*

1. The Leaves of this Fearn grow about two Foot high, and are of a yellow Green Colour; and the Seed brown.
2. It grows in Hedges & shady Lanes, bearing Seed in August.
3. The Root is said to be hurtful to the Female Sex, and to cause Miscarriage; but is accounted good for Obstructions of the Liver and Spleen.
4. Greek, Ητρείς. Latin, *Filix non ramosa dentata*. Spanish, *Helecho Yerva*. Italian, *Felce*. French, *Fengiere masle*. German, *Baldfarn*. Dutch, *Daren manneke*.

Plate 324. *Osmond-royal. Filix florida.*

1. The Leaves grow about three Foot high, and are of a pale Green Colour; and the Seed brown when ripe.
2. It grows in marshy and boggy Places, particularly in a Bog at the Backside of Woolwich, near the Warren, & the Seed is ripe in August.
3. The Roots are esteem'd good for Rickets in Children, as also for Ruptures, Wounds & Bruises; and for Obstructions of Liver & Spleen.
4. Greek, Αγρόπτεγίς. Latin, *Osmunda Regalis*. Spanish, Italian, *Felce*. French, *Osmonda Regale*. German, *Baum farn*. Dutch, *Groote Water Daren*.

Plate 325. *Female Fearn, or Brakes. Filix foemina.*

1. The Leaves grow about two or three Foot high, and are a grass Green, and the Seed brown.
2. It grows on Commons and Heaths, and flowers in July.
3. The Roots are accounted good for Worms, especially the Lumbriculi. Some make a kind of Pot-Ash from the Stalks & Leaves burnt.
4. Greek, *Ονήλιος*. Latin, *Filix ramosa major, pinnulis obtusis, non dentatis*. Spanish, *Italian, Felce femina.*
French, *Fengiere* German, *Farn.* Dutch, *Daren Dyfken.*

Plate 326. *Madder. Rubia tinctorum.*

1. The Stalks grow about three Foot high, the Leaves are a light grass Green, and the Flowers yellow.
2. It is planted in Fields and Gardens, and flowers in May.
3. The Roots are esteem'd opening and attenuating, and good for the Jaundice, Dropsy, Stone and Strangury, & to dissolve congeal'd Blood. Some use them in Wounds and Contusions. The Dyers use the Roots to dye red with.
4. Greek, *Ερυθρόδαρον*. Latin, *Rubia tinctorum sativa*. Spanish, *Ruvia*. Italian, *Robbia*. French, *Garence*. German, *Ferberrat*. Dutch, *Meekrab*.

Plate 327. *The Willow. Salix.*

1. The officinal Willow is the largest of the Common Willows, & has long Narrow Leaves, green above and whitish underneath.
2. It grows commonly in moist Places, & bears Catkins in April.
3. The Juli, Leaves and Bark, are said to be cooling and binding, & good for all kinds of Fluxes and Haemorrhagies. The Sap that comes from a wounded Bark is accounted good for inflam'd & bloodshot Eyes.
4. Greek, *Ιτ'α*. Latin, *Salix vulgaris alba, arborescens*. Spanish, *Salce*. Italian, *Salcio*. French, *Saulx*. German, *Fellinger*. Dutch, *Wilge Boom*.

Plate 328. *The Ash. Fraxinus.*

1. This Tree grows to a great Height, the Leaves are a dull Green, and the Catkins a yellow Green.
2. It grows in Woods & Hedges, & the Catkins come out in March & April.
3. The outer Bark is accounted good for the Spleen, the Stone and the Gravel; and the inner Bark is used with good Success, in foreign Parts, against intermitting Fevers. The Leaves are used for the Biting of all venomous Creatures. The Seed, called *Lingua avis*, is heating and drying, and helps the Disorders of the Liver & Spleen, provokes Urine eases the Stone, and Pains in the Side.
4. Greek, *Μελία*. Latin, *Fraxinus excelsior, & Fraxinus*. Spanish, *Frasno*. Italian, *Fraicino*. French, *Fresne*. German, *Eschenbaum*. Dutch, *Esjenboom*.

[Faint, illegible handwritten text]

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly grainy texture and is covered with numerous small, dark brown spots, possibly foxing or dirt. There are also some faint, larger smudges and discolorations, particularly towards the edges. The overall appearance is that of an old, well-preserved but slightly worn piece of paper.

The above is a list of the names of the persons who have been
 named in the above report as having been present at the
 meeting of the Board of Directors of the Bank of the
 City of New York, held on the 10th day of January, 1884.
 The names of the persons who have been named as having
 been present at the meeting of the Board of Directors of the

THE STATE OF NEW YORK

The State of New York, in and for the County of Albany, do hereby certify that the within and foregoing is a true and correct copy of the original as the same appears from the records of the said County.

Given under my hand and the seal of the said County, at Albany, this 1st day of January, 1881.

JOHN W. BROWN, Clerk of the County of Albany.

Plate 329. *Melon Melo.*

1. The Stalks of this Plant trail on the Ground, like those of a Cucumber; the Leaves are a yellowish Green, & the Flowers yellow.
2. It is planted here in Gardens, flowering in June, the Fruit being ripe in July and August.
3. The Seed is one of the greater cold Seeds, and is commonly used in Emulsions; being cooling, & useful in Fevers and other inflammatory Distempers; it also helps the Stone, Strangury and Heat of Urine. Doctor Boerhave says, that the Meat of the Melon is warming, and aromatic, but advises to eat it moderately and fasting, because it is apt otherways to force bloody Urine, & adds *vix aliquid plus in Venere stimulat.*
4. Greek, *Μήλον*. Latin, *Melo vulgaris*. Spanish, *Melon*. Italian, *Mellone*. French, *Melon*. German, *Melon*. Dutch, *Popone*.

Plate 330. *Chesnut Castanea.*

1. This Tree grows to a large Size; the Leaves are a deep grass Green, and the Flowers a pale Red, with yellow Stamina.
2. It is planted generally in Walks, for its beautiful Shade; the Catkins come out early in the Spring, & the Fruit is ripe in August & September.
3. The Fruit is much eat in the Warm Countries for Food; the inward Skin of the Fruit is said to be good for all kinds of Fluxes, either of Blood or Humours.
4. Greek, *Κάσταν*. Latin, *Castanea sativa*. Spanish, *Castano*. Italian, *Castagne*. French, *Châtaigner*. German, *Kesten*. Dutch, *Castanje Boom*.

Plate 331. *Tamarisk Tamariscus.*

1. This grows to be a large Tree in the Warm Countries; the Leaves are a light grass Green, and the Flowers have a blush of red.
2. It is planted here in Gardens; the Catkins come out in the Spring, & are succeeded by small Seeds included in a down.
3. The Leaves, Bark and Wood are used, being accounted Specific for all Disorders of the Spleen; and the Bark is said to be very good for the Rickets in Children.
4. Greek, *Μυρίκα*. Latin, *Tamarix Gallica*. Spanish, *Tamarisco*. Italian, *Tamarigio*. French, *Tamaris*. German, *Tamaristen*. Dutch, *Tamaris*.

Plate 332. *Sparagus Asparagus.*

1. The Stalks grow about four Foot high; the Leaves are a deep grass Green, and the Flowers greenish, which are succeeded by red Berries.
2. It is planted in Gardens, and flowers in July.
3. The Root is one of the five opening Roots, & is esteemed good for all Obstructions of the Reins & Bladder; as also the Dropsy and Jaundice. The young Shoots, which we call Sparagus, are pleasant & Wholesome Food, being of a cleansing Nature, and light Digestion, provoking Urine, to which they give a foetid Smell.
4. Greek, *Ἀσπαράγος*. Latin, *Asparagus sativus*. Spanish, *Esparragos*. Italian, *Asparago*. French, *Asperges*. German, *Spargen*. Dutch, *Aspergies*.

This image shows a blank, aged, cream-colored page. The paper has a visible texture and some minor blemishes or foxing, particularly towards the bottom. There is no text or other markings on the page.

Plate 333. *The Succotrine Aloe. Aloe Succotrina.*

1. The Stalks grow about three Foot high, the Leaves are a blue Green, and the Flowers a light Red.
2. It is a Native of the East Indies, and flowers here in December.
3. The best Aloes of this Species comes over in skins from the Island Succotora. - Aloes is a great Ingredient in most of the officinal Pills, being accounted a good Stomachic, and useful to carry off tough & slimy Humors from the Bowels. Outwardly it is used for fresh Wounds, a little of the fine Powder being put in them.
4. Greek, *Αλόη*. Latin, *Aloe succotrina, angustifolia spinosa, flore purpureo*. Spanish, *Azibar Cicotrina*. Italian, *Aloe*. French, *Aloes*. German, *Aloen*. Dutch, *Aloe*.

Plate 334. *Jews Ears. Auricula Judae.*

1. This fungous Excressens is wrinkled, & turned up like an Ear, and is whitish on the outside & black within, with several little Veins.
2. It grows on the Trunk of the Elder.
3. Jews Ears are esteem'd good for the swelling and Inflammation of the Tonsils, sore Throats and Quinsies.
4. Greek, *Αυρίδα*. Latin, *Auriculae Judeorum*. Spanish, *Orejas de las Judias*. Italian, *Orecchia di Judeas*. French, *Oreilles des Juifs*. German, *Alben*. Dutch, *Alben*.

Plate 335. *Tree Lungwort. Muscus Pulmonarius*

1. This Moss has wrinkled tough Leaves, greenish above, & Ash-colour'd underneath.
2. It grows upon the Trunk of the Oak.
3. It is accounted good to stop inward Bleeding, & the too great Flux of the Menses. The common People use it for all Disorders of the Lungs & Breast, boiling it in Pectoral Drinks, & making Syrups of it. The German Ephemerides Anno 3. Obs. 290. commend it as an extraordinary Remedy for *yellow Jaundice*.
4. Greek, *Πνεύμων*. Latin, *Lichen arborum*. Spanish, *Pulmonaria de Arbol*. Italian, *Pulmonaria*. French, *Pulmonaire d'Arbre*. German, *Lungenkraut*. Dutch, *Lunge kruid*.

Plate 336. *Ash-colour'd Liverwort. Lichen cinereus.*

1. This Lichen is ash-colour above, and whitish underneath.
2. It grows on Barren Places and Heaths, and is in perfection in October.
3. This Plant is that which the great Doctor Mead has found out to be a Specific for the Cure of the Bite of a mad Dog; and is to be taken in the manner following, viz: Let the Patient be blooded at the arm nine or ten ounces. Take of the Herb call'd in Latin *Lichen Cinereus Terrestris*, in English *Ash-colour'd Ground Liverwort*, clean'd, dry'd, and powder'd, half an ounce. Of black Pepper powder'd, two drachms. Mix these well together; and divide the powder into four doses, one of which must be taken every morning, fasting, for four mornings successively in half a pint of cow's milk warm. After these four doses are taken, the Patient must go into the Cold Bath, or a cold spring or river, every morning fasting for a month: he must be dipt all over, but not stay in (with his head above water) longer than half a minute, if the water be very cold. After this he must go in three times a week for a fortnight longer.
4. Greek, *Λειχήν*. Latin, *Lichen terrestris cinereus*. Spanish, *Higadela*. Italian, *Lichene*. French, *Epatique*. German, *Stein Zeberkraut*. Dutch, *Stein Zeberkraut*.

There is a small building on the left side of the road, which is the only one of its kind in the neighborhood. It is a simple structure, built of wood, and is used for the purpose of a school. The teacher is a young man, who is very kind and intelligent. He has been teaching for some time, and his pupils are all very well behaved. The school is very small, but it is a great help to the community. The children are all very happy to go to school, and they all like their teacher. The school is a very important part of the community, and it is a great help to the children. The teacher is a very good man, and he is very kind to all the children. The school is a very good place for the children to go to, and it is a great help to the community.

The school is a very good place for the children to go to, and it is a great help to the community. The teacher is a very good man, and he is very kind to all the children. The school is a very good place for the children to go to, and it is a great help to the community.

Plate 337. *Coffee. Coffee.*

1. This is a low Shrubby Tree or Bush, with Leaves like those of the Laurel, and Flowers like the Jasmine.
2. It grows in Arabia Felix; and flowers here in April and May.
3. The Coffee that is commonly drank, is made of the Berries of this Tree roasted; and is accounted good for those who are of a cold stegmatic Constitution. But for Persons of a thin hot and dry Temperament, the drinking it too much may bring on them Nervous Distempers.
4. Greek, *Εύωρυμος*. Latin, *Euonimo similis Aegyptiaca*, fructu *Baccis Lauri simili*. Spanish, *Café*. Italian, *Caffè*. French, *Caffé*. German, Dutch,

Plate 338. *The Clove. Caryophyllus aromaticus.*

1. The Trunk of this Tree grows about the Bigness of a Man's Waist, the Leaves resemble those of Bay, in shape size and Colour; the Flower is red, and the Seed a reddish Brown.
2. It grows in the Molucca Islands, in the East Indies; and this Specimen was taken from a Branch of the Tree at St. Hans Sloans.
3. Cloves are esteemed heating, drying, cordial, cephalic and Stomachic; being good to stop Vomiting, strengthen a weak Stomach, expel Wind, prevent Fainting and malignant Distempers. The Distill'd Oyl is said to cure the Tooth-Ach, a Bit of Lint being dipp'd in it, and put into the Hollow Tooth.
4. Greek, *Καρύοφυλλον*. Latin, *Caryophyllus*. Spanish, *Clavos*. Italian, *Garofoli*. French, *Girofle*. German, *Negelen*. Dutch, *Negelein*.

Plate 339. *The true Euphorbium. Euphorbium verum Antiquorum.*

1. This Specimen was taken from a Plant in the Greenhouse in Chelsea Garden, about three Foot high, & much branch'd, answering the Description of that in Miller's Botanicum Officinale; the Stalks being triangular of a light grass Green, and very Prickly; the Flower is whitish, with a little tincture of Red on the Back of the Leaves.
2. It grows in Barbary and the East Indies.
3. This Plant is full of a caustic Milk, which when dryed is the Euphorbium of the Shops; being a violent Sternutatory, and is sometimes used in Apoplexies and Lethargies. - Outwardly it is used to clean foul and rotten Bones, and is put in to Drawing Plaisters.
4. Greek, *Εὐφορβιον*. Latin, *Euphorbium*. Spanish, *Euphorbio*. Italian, *Euforbio*. French, *Euphorbe*. German, Dutch,

Plate 340. *Euphorbium. Euphorbium.*

1. This Specimen was taken from a Plant about three Foot high, in a Greenhouse which is said to be an other Species of the Euphorbium, & is shown on Lecture Days with the former. It differs from the other both in Shape and Colour; this growing very much like a torch Thistle, having young Buds on the Sides like those of an Indian Fig; and of a blue Green Colour.
2. It grows in the same Countries as the other; but it has not flowered in England, nor has any Herbal taken Notice of the Flower and Fruit.
3. The same Qualities are given to this as the Former.
4. Greek, *Εὐφορβιον*. Latin, *Euphorbium*. Spanish, *Euphorbio*. Italian, *Euforbio*. French, *Euphorbe*. German, Dutch,

1. The first part of the paper is devoted to a general
discussion of the problem. It is shown that the
problem is of great importance and that it has
not been completely solved. The author then
presents a new method for solving the problem.
The method is based on the use of the
variational principle and the method of
undetermined multipliers. The author shows
that the method is very simple and that it
can be applied to a wide range of problems.

2. In the second part of the paper, the author
applies the method to the problem of the
motion of a particle in a potential field. It is
shown that the method leads to the same
results as the method of Lagrange, but that it
is much simpler and more direct. The author
also shows that the method can be used to
find the minimum energy of a system.

3. In the third part of the paper, the author
applies the method to the problem of the
motion of a rigid body. It is shown that the
method leads to the same results as the method
of Lagrange, but that it is much simpler and
more direct. The author also shows that the
method can be used to find the minimum energy
of a system.

4. In the fourth part of the paper, the author
applies the method to the problem of the
motion of a fluid. It is shown that the method
leads to the same results as the method of
Lagrange, but that it is much simpler and
more direct. The author also shows that the
method can be used to find the minimum energy
of a system.

Plate 341. *Red Coral. Corallium rubrum.*

1. This Plant spreads its Branches like a small Tree, and when growing the outside is whitish; the three separate Pieces are such as are commonly Sold in the Shops.
2. It grows upon the Rocks at the Bottom of the Tyrrhenian Sea, and on the Coasts of Spain and France; this Specimen was taken from a Branch in M^r. Nicholls's curious Collection.
3. Coral is esteemed, cordial drying & restraining, good to sweeten the Blood and free the Stomach from Acid Sour Juices; it stops all kinds of Fluxes and Haemorrhagies; & wherever an Alkali is necessary, this will do as much as any. The Official Preparation from Coral is, The Electuarium Diacoralion.
4. Greek, Κοράλλιον. Latin, Corallium rubrum majus. Spanish, Coral roxo. Italian, Corallo rosso. French, Corail rouge. German, Gorall. Dutch, Koraal.

Plate 342. *True White Coral. Corallium verum album.*
White Coral of the Shops. Corallium Officinarium.

1. The true white Coral is never to be met with in the Shops, & rarely in any Cabinet; this Specimen was taken from a Branch in S^r. Hans Sloan's unparalleled Collection, & is Numbered 178. in his Cabinet; being one of the greatest Rarities there; the other Coral is the Corallium Officinarium of Lobel and C. Bauhin, but Tournefort makes it a Madrepora; this Specimen was taken from M^r. Nicholls's curious Collection; and was the Coral of y^e Shops, in Lobel's time.
2. The true white Coral, grows in the Spanish West India Seas, & the other grows in the Mediterranean Seas.
3. White Coral is cooling and binding, good for the Heart-burn or any Disorders that proceed from sharp Acid Juices in the Stomach or Blood.
4. Greek, Κοράλλιον. Latin, Corallium verum album & Corallium Officinarium. Spanish, Coral blanco. Italian, Corallo bianco. French, Corail blanche. German, Gorall. Dutch, Koraal.

Plate 343. *White Coral. Corallium album.*

1. Both these Specimens are taken from M^r. Nicholls's curious Collection, and are what the Shops sell now; it is generally gathered in little Pieces like these that are separate on the Plate.
2. Both these Sorts of Coral grow on the Rocks of the Western Ocean, & the Coast of France.
3. These Corals have the same Qualities as the former; and such Corals as are whitest and firmest in their Texture are esteemed the Best.
4. Greek, Κοράλλιον. Latin, Corallium album. Spanish, Coral blanco. Italian, Corallo bianco. French, Corail blanche. German, Gorall. Dutch, Koraal.

Plate 344. *Black Coral. Corallium nigrum.*

1. This Coral is of a shining black Colour, & very Smooth; and grows branchid. It is taken from a Piece in S^r. Hans Sloan's Cabinet & numbered 527.
2. It grows upon Rocks in the Sea near Massilia; according to Gerard.
3. The same Qualities are given to this as the others; but it is hardly to be met with in the Shops; which may be the Reason it is seldom prescribed.
4. Greek, Κοράλλιον. Latin, Corallium nigrum. Spanish, Coral negro. Italian, Corallo nero. French, Corail noir. German, Gorall. Dutch, Koraal.

Plate 345. *Acacia. Acacia.*

1. This grows to be a pretty big Tree; the Leaves are a bright grass Green, and the Flowers yellow.
 2. It grows in the Eastern Countries particularly in Egypt.
 3. The true Acacia of the Ancients is made from the Pods of this Tree, before they are ripe; and is accounted restraining, cooling & incrustating, good against spitting of Blood & all kinds of Fluxes; but it is rarely to be met with in the Shops now a Days. Gum Araback comes from this Tree, which is very serviceable in Coughs & the Heat of Urine.
 4. Greek, *Akakia*. Latin, *Acacia foliis scorpioides leguminosae*. Spanish, Italian, French, *Acacia*. German, *Schlehdorn*. Dutch, *Sleepruimen*.
-

Plate 346. *Lavender Cotton. Abrotanum foemina.*

1. This is a shrubby Plant that keeps green all the Winter, the Leaves are a light willow Green, and the Flowers yellow.
 2. It grows naturally in Italy & the Warmer Countries, flowering in July.
 3. The Leaves and Flowers boiled in Milk, and taken fasting, are said to destroy Worms. The Ancients commend it, infused in Wine as good against Obstructions of the Liver, and the Jaundice.
 4. Greek, *Αβρότονον*. Latin, *Chamaecyparissus*. Spanish, *Abrotono*. Italian, *Herba Camphorata*. French, German, Dutch,
-

Plate 347. *The Camphore-Tree. Camphorifera.*

1. It grows about the Bigness of a Walnut Tree; the Leaves are a dull Green, and the Fruit blackish.
 2. This Specimen was taken from a Branch in S^r. Hans Sloan's Collection, but there was no Flower to it; its Native Country is Japan.
 3. From this Tree comes the Camphire of the Shops, which is good in all malignant Distempers, taken inwardly. Outwardly it is used in all Inflammations Burns and Scalds.
 4. Greek, Latin, *Camphora*. Spanish, *Camphorado*. Italian, French, *Camphre*. German, *Campher*. Dutch, *Camphir*.
-

Plate 348. *Black Pepper. Piper nigrum.*

1. This Plant grows like our large white Bindweed; the Leaves are a bright grass Green, and the Fruit a dark Brown.
2. It grows in the East Indies.
3. Pepper is heating and drying, good to expell Wind, & ease the Collic; it strengthens the Nerves, Head, and Sight. Pepper should never be Powdered fine, but grossly broken, when it is eaten with Food or used to Season it.
4. Greek, *Πεπερι*. Latin, *Piper rotundum nigrum*. Spanish, *Pimiento nero*. Italian, French, *Poudre noir*. German, *Pfeffer*. Dutch, *Peper*.

Plate 349. *The Orange Tree. Aurantia.*

1. This Tree grows pretty large in its Native Climates; the Leaves are a grass Green, and the Flowers white.
2. It grows in Spain, Italy and Portugal, and flowers all the Year.
3. The Sevil Orange is that which is used in the Shops; the Peel is accounted good to strengthen and warm the Stomach, prevent Nausea & Vomiting, and ease the Collick. The Juice is much used for the Scurvy and Burning Fevers. Official Preparations are, The Water distill'd from the Flowers, a Conserve of the Peel, The same candied, And a Syrup of the Juice.
4. Greek, *Latin, Malus Aurantia major. Spanish, Nar-anjer.*
Italian, Aranci. French, Pomme D'Oranges. German, Pomerant. Dutch, Oranje.

Plate 350. *Pockwood or Lignum Vitae. Guajacum.*

1. This Tree grows about Thirty Foot high; the Leaves are a yellow Green, and the Flowers bluish; That Specimen mark'd 1. & 2. grows in Jamaica; and is taken from S^r. Hans Sloan's; And that mark'd 3. 4. & 5. is taken from a young Plant in the Physick Garden which answers of Description of that which S^r. Hans Sloan calls the Porto Rico Sort.
2. The first Species grows in Jamaica, and the last in Brasile.
3. The Bark & Wood are good for the Dropsy, Gout, King's Evil and the Lues Venerea. The Gum is useful in Scorbatick Cases or any Breaking out of the Skin.
4. Greek, *Latin, Lignum Vitae. Spanish,* *Italian,*
French, Guajac. German, Frankosum-holz. Dutch, Pokhout.

Plate 351. *Green Tea. Thea, & Thea Sinensis.*

1. This Shrub grows about five Foot high; the Leaves are a deep Green, and y^e Flowers a pale Red; this Specimen was taken from a Branch that S^r. Hans Sloan has.
2. It grows in China, and flowers for several Months in the Summer.
3. This Tea is accounted good to purify the Blood, promote Digestion, strengthen the Head, provoke Urine and prevent the Stone and Gout. But it must be drank moderately.
4. Greek, *Latin, Thea, & Chaa. Spanish, The verde. Italian,*
French, The verd. German,
Dutch, The.

Plate 352. *Bohea or Peco Tea. Thea frutex, Bontii, Chaa.*

1. This Shrub grows much of a height as the other, and is thought the same by many; and that the only Difference is in the Drying of the Leaves or the Time of gathering them; whereas by what Kempfer says, the Soyl and the Climate make a considerable Difference; his Words are *Folium ratiore foli natalis, sili. aetatis haud parum in substantia magnitudine et figura variat. f. 611.*
2. It grows in Japan and flowers in Summer. This Specimen was taken from Kempfer, who took it on the Spot.
3. This Tea is esteem'd balsamic and analeptic; and good for Consumptions; but must be used moderately.
4. Greek, *Latin, Thea. Spanish, The. Italian,*
French, The. German, *Dutch, The.*

Plate 353. *The Nutmeg. Nux Moschata.*

1. This Tree grows as big as a Pear-Tree, the Leaves are a grass Green and the Flowers yellowish; which are succeeded by Fruit as big as a Peach, whose outward covering is soft and juicy like that of a Walnut, under which lies the Mace, firmly sticking to the hard Woody Shell; that contains the Nutmeg of the Shops. This Specimen is taken from S^r. Hans Sloan's Collection, but the unripe and ripe Fruit are taken from some that M^r. Rand had preserved on the Island, and are as large as the Life.
2. It grows chiefly in Banda, an Island in the East Indies.
3. Nutmegs are heating, drying and carminative; good to strengthen the Stomach and Bowels, stop Vomiting, help Digestion, comfort the Head & Nerves, prevent Swooning, & Muscarriage. The Mace has much the same Qualities but more penetrating; & is also accounted good for the Sight & to strengthen the Memory.
4. Greek, Μοσχάριον. Κάριον μύρσικον. Latin, Myristicae. Spanish, Nuez de Especie. Italian, Noci Moschade. French, Nois Muscades. German, Muscatennuss. Dutch,

Plate 354. *The Cinamom Tree. Cinamomum.*

1. This Tree grows large in its Native Climate; the Leaves are a willow Green, & the Flowers whitish. This Specimen is taken from S^r. Hans Sloan's Collection.
2. It grows in the Island of Ceylon in the East Indies.
3. The Cinamon of the Shops is the Bark of this Tree, its outside being first pared off, and is accounted cordial and restringent good in Diarrheas & Fluxes; and is an Ingredient in all the Capital Medicines. Official Preparations are, the Aqua Cinamomi fortis et tenuis, the Distilled Oil, the Syrupus de Cinamomo and the Pulvis Diacinnamomi.
4. Greek, Κέρυαννον. Latin, Cinnamomum. Spanish, Canola. Italian, Canella. French, Cannelle. German, Zimmet coezlen. Dutch,

Plate 355. *Jamaica Pepper. Piper Jamaicense.*

1. This Tree grows about thirty Foot high; the Leaves are a deep shining Green, and the Flowers staminous; and the Fruit black when ripe. This Specimen was taken from S^r. Hans Sloan's Collection.
2. It grows on the hilly Parts of the Island of Jamaica, and flowers in June, July and August.
3. The Fruit is accounted cordial and Stomatic, good to expell Wind, strengthen the Stomach, Bowels and Nerves, and help the Collic.
4. Greek, Πέπερι. Latin, Pimenta. Spanish, Pimienta de Jamaica. Italian, Pevero. French, Poivre de Jamaïque. German, Pfeffer. Dutch,

Plate 356. *Long Pepper. Piper longum.*

1. This Plant twists about any thing that is in its Way. The Leaves are a deep grass Green on the Face & light on the Back, and the Flowers monopetalous. That Specimen mark'd 1. 2. & 3. was taken from S^r. Hans Sloan's Collection; and that mark'd 4. 5. & 6. is the long Pepper of the Shops.
2. It grows in Java & Malabar & other Parts of the East Indies.
3. It imitates the Black Pepper (see Plate 348.) in Taste & Vertue and is also accounted alexipharmic; being an Ingredient in the Theriaca Andromachi.
4. Greek, Πέπερι. Latin, Piper longum orientale. Spanish, Pimienta larga. Italian, Pevero lungo. French, Poivre long. German, Pfeffer. Dutch,

Plate 357. *Cotton. Bombax.*

1. This Shrub grows about a Yard high; the Leaves are a deep Green, and the Flowers yellow with a purple Bottom.
2. It is cultivated in Greece, Turkey, Sicily, and Malta; & flowers in June.
3. The Seed is accounted balsamic and restringent, good for Coughs, shortness of Breath, soreness of Lungs, and Fluxes of all sorts.
4. Greek, *Ξύλον, βάμβαξ*. Latin, *Gossypium frutescens semine albo*. Spanish, *Algodon*. Italian, *Bambaggia*. French, *Coton*. German, *Baumwoll*. Dutch, *Kattoen*.

Plate 358. *The Dragon-Tree. Draco Arbor.*

1. This Tree grows large in its Native Climates; the Leaves are a bluish Green, and the Flowers staminous. The Specimen mark'd 1. is taken from a Tree in the Physick Garden & that mark'd 2. 3. & 4. from Chusius.
2. It grows in the Madera and Canary Islands.
3. The Dragon's Blood of the Shops comes from this Tree, and is esteem'd restringent, drying and binding; good for Diarrhaeas Dysenteries, spitting of Blood and all kinds of Haemorrhagies. It also fastens loose Teeth, and stops the Bleeding of the Gums & helps the Scurvy in them.
4. Greek, *Δράκον*. Latin, *Draco arbor Chusii*. Spanish, *Dragon's Blood*. Italian, *Draco arbor*. French, *Dragon's Blood*. German, *Draco arbor*. Dutch, *Dragon's Blood*.

Plate 359. *Cyclamen leaved Asarum. Asarum Cyclaminis folio.*

1. This Plant grows about six Inches high, the Leaves are a deep Green on the Face and light on the Back; and the Flowers purple.
2. It grows in the West Indies, and flowers in May.
3. The Roots are accounted cordial, alexipharmic and sudorific good in all malignant contagious Fevers; it also helps the Collic and strengthens the Stomach.
4. Greek, *Asarum*. Latin, *Asarum virginianum Cyclaminis folio*. Spanish, *Asarum*. Italian, *Asarum*. French, *Asarum*. German, *Asarum*. Dutch, *Asarum*.

Plate 360. *The Scythian Lamb. Agnus Scythicus.*

1. This is a Moss that grows upon the Roots of a Fern,* of a light brown Colour.
2. It grows in Tartary and Scythia.
3. It is esteem'd good for all kinds of Fluxes and Haemorrhagies, and to stop the Bleeding of Green Wounds.
4. Greek, *Agnus Scythicus*. Latin, *Borometz*. Spanish, *Agnus Scythicus*. Italian, *Agnus Scythicus*. French, *Agnus Scythicus*. German, *Agnus Scythicus*. Dutch, *Agnus Scythicus*.

Plate 361. *The Citron-Tree. Citria Malus.*

1. This Tree does not grow very big in its Native Climates; The Leaves are light grass Green and the Flowers white.
2. It grows in the West Indies, and flowers in the Spring.
3. The Peel is esteem'd drying, warming, & alexipharmic, good to strengthen the Stomach, and help malignant & pestilential Distempers. The Juice is cooling and sudorific, good to resist Putrefaction, and useful in all kinds of Fevers. The Seed is said to partake of the same Vertues, in a lower Degree, and is also good to destroy Worms. Official Preparations are, *Aqua Corticum Citri. Syrupus à Succo, & à Corticibus Citri.*
4. Greek, *Μένδικα πῦλλα*. Latin, *Malus Medica*. Spanish, *Cidras*. Italian, *Citrono*. French, *Citron*. German, *Citron Depffell*. Dutch, *Citroen*.

Plate 362. *The Lemon-Tree. Limonia Malus.*

1. This Tree very much resembles the Orange Tree (see P. 349.) in its manner of Growth; the Leaves are a light grass Green, and the Flowers white.
2. It grows in Spain & Portugal & flowers for several Months in the Summer.
3. Lemons are cooling & grateful to the Stomach, and very useful in all sorts of Fevers; they are also good for the Stone & stoppage of Urine. - The Juice mixt with Salt of Wormwood is accounted an excellent Medicine to stop Vomiting & strengthen y^e Stomach. The Official Preparation is, The Syrup of the Juice.
4. Greek, *Λιμόνιον*. Latin, *Malus Limonia acida*. Spanish, *Limon*. Italian, *Limone*. French, *Limonier*. German, *Limonien*. Dutch, *Limoen*.

Plate 363. *The Oily-Palm Tree. Palma oleosa.*

1. This Tree grows to a good Bigness in its Native Country; the Leaves are a grass Green, and the Fruit a Chesnut Colour.
2. It grows on the Coast of Guinea.
3. The Oil, which is express'd from the Fruit of this Tree, is accounted good for all kinds of Pains and Weakness of the Nerves, Cramps in the Limbs, and strains and Bruises.
4. Greek, *Χαμαιπῶς*. Latin, *Palma foliorum pediculis spinosis fructu pruni-formi, luteo Oleosa*. Spanish, *Palma menor*. Italian, *Palma minore*. French, *Palmier*. German, *Palmenbaum*. Dutch, *Palmenboom*.

Plate 364. *The Mandrake. Mandragora.*

1. The Stalks on which the Flowers grow are about six Inches high, y^e Leaves are large and of a deep Green Colour; and the Flowers white.
2. Its Native Countries are Spain, Italy & Turkey. It flowers in February.
3. This Plant is used outwardly for all kinds of Inflammations, hot Tumours and scrophulous Swellings. - Some commend the Juice, dropt into the Eyes, as good to take away their Heat and Redness. - By Reason that this Plant is rarely to be met with here; they generally supply its Place (as an Ingredient in the Unguentum Populeon) with Henbane or English Tobacco.
4. Greek, *Μανδραγόρας*. Latin, *Mandragora fructu rotundo*. Spanish, *Mandracola*. Italian, *Mandragola*. French, *Mandragore*. German, *Ulcraun*. Dutch, *Mandrager's-kruid*.

THE
JOURNAL
OF
JAMES
MILNE
1841-1842

Plate 365. *Mouse-Ear. Pilosella.*

1. The Stalks grow about 4 or 5 Inches high, the Leaves are a dark Green above and whitish underneath, and the Flowers a pale Yellow, strip'd with Purple on the Back.
2. It grows on Heaths and Commons; flowering all the Summer.
3. Doctor Hulse made use of the Juice of Mouse-Ear, as a Remedy against the Herpes miliaris, or Shingles. It is accounted drying & binding, & a good vulnerary Plant; and good in all Fluxes. A Decoction of it, used as a Gargarism, is commended for Ulcers in the Mouth.
4. Greek, Μυδὸς ὤρα. Latin, Auricula Muris. Spanish, Velloquilla. Italian, Orrechiana. French, Pilosella. German, Maus-Ohrlein. Dutch, Muisen-Oir.

Plate 366. *House-Leek. Sedum majus.*

1. The Stalk grows about a Foot high, the Leaves are a light Green tinctur'd with Purple; and the Flowers reddish.
2. It grows on the Tops of Houses, and flowers in June.
3. Houseleek is esteem'd cooling and restringent; and by some is commended as good to quench Thirst in Fevers & cool the Heat and sharpness of Urine, mixed in Posset Drink. Prevotius in his Medicina Pauperum commends an equal Quantity, viz. ℥ij. of the Juice of this and Persicaria maculata boiled away to a Third Part, & given in Drink as a certain Medicine to stop a Looseness and bloody Flux. Outwardly it is useful against Burns and Scalds, St. Anthony's Fire and the Shingles.
4. Greek, Ακίζωρ μωα. Latin, Sedum majus vulgare. Spanish, Hiyerva puntera. Italian, Sempervivo maggiore. French, Joubarbe. German, Haus-lauch. Dutch, Huis-loak

Plate 367. *The true Maiden-Hair. Adiantum vulgare.*

1. The Stalks grow about a Foot high, the Leaves are a grass Green, & y^e Seed brown.
2. It grows in Cornwall; but what is used in the Shops is generally brought from the Southern Parts of France.
3. This is the Maiden-Hair that ought to be used in making the Syrup, and every where else, where the true is prescribed; but the English Maiden-Hair generally supplies its Place. The true Maiden-Hair is opening & Attenuating, good for all Distempers of the Lungs and Breast, as Coughs, shortness of Breath, Hoarseness and the like. It is also accounted good for the Stone, Gravel, and Strangury. The Official Preparation is, the Syrup.
4. Greek, Αδίατρον. Latin, Capillus veneris. Spanish, Culantrillo de Pozzo. Italian, Capel venere. French, capil venere. German, Franen-Haar. Dutch, Venus-Hair.

Plate 368. *Purging Flax. Linum catharticum.*

1. The Stalks grow about a Span high, the Leaves are a grass Green and the Flowers white.
2. It grows upon Dry hilly Places; flowering in June and July.
3. This Plant is much used by the Common People, for Rheumatic Pains in the Limbs, as also for tertian & quartan Agues & the Dropsy. They boil a handfull of it in Wine or Ale & drink the Decoction, which purges them strongly.
4. Greek, Λινον ἄγειον. Latin, Linum pratense flosculis exiguis. Spanish, Lino montaraz. Italian, Lino salvatico. French, Lin sauvage. German, Flachs-lein. Dutch, Linnekruid.

1864
The first of the year was a very dry one
and the crops were much injured by the
drought. The wheat was particularly
suffered and the yield was very small.
The corn was also much injured and
the yield was very small. The
cattle and sheep were also much
suffered and the yield was very small.

The second of the year was a very
wet one and the crops were much
injured by the rain. The wheat was
particularly suffered and the yield was
very small. The corn was also much
injured and the yield was very small.
The cattle and sheep were also much
suffered and the yield was very small.

The third of the year was a very
dry one and the crops were much
injured by the drought. The wheat was
particularly suffered and the yield was
very small. The corn was also much
injured and the yield was very small.
The cattle and sheep were also much
suffered and the yield was very small.

The fourth of the year was a very
wet one and the crops were much
injured by the rain. The wheat was
particularly suffered and the yield was
very small. The corn was also much
injured and the yield was very small.
The cattle and sheep were also much
suffered and the yield was very small.

The Great Plantain

This plant is very common in the low grounds of the island, and is much used by the natives for medicinal purposes.

The leaves are large and broad, and are used to wrap round the head in case of a headache, or to wrap round the chest in case of a cough.

The roots are also used for medicinal purposes, and are said to be very powerful.

The plant is very hardy, and will grow in any soil, and in any climate.

It is very common in the low grounds of the island, and is much used by the natives for medicinal purposes.

Plate 373. *The Coco-Nut Tree. Cacao. & Cacavate.*

1. This Tree grows to be pretty big in its native Climates, the Leaves are a deep Green & the Flowers yellow. This Specimen is taken from Mr. Joseph Millar's Collection.
2. It grows in Jamaica and Martinico; but the Best grow in the Caraccos, in New Spain.
3. The Kernels of the Nuts is what we make the Chocolate of, which is now so much used for Food; being accounted nourishing, restorative, fatning & provocative.
4. Greek, *Λαγυμ*. Latin, *Amigdalis similis Guatemelensis*. Spanish, *Cacao*. Italian, *Cacao*. French, *Cacao*. German, *Kakao*. Dutch, *Cacoun*.

Plate 374. *Anise. Anisum.*

1. It grows about two Foot high, the Leaves are a pale Green & y Flowers white.
2. It grows in Germany and Spain, and flowers in July.
3. The Seed is one of the four greater hot Seeds; and is esteemed good to expell Wind out of the Stomach and Bowels, either taken at the Mouth or applied as a Glyster. It is also used for cold affections of the Lungs, Difficulty of Breathing and Asthma. The Oil distill'd from the Seed is often used in Carminative and Anodyne Linaments, particularly for the Pleurisy and other Pains in the Side. The Official Preparation is, the Chemical Oil distill'd from the Seed.
4. Greek, *Ανισον*. Latin, *Anisum Herbarius*. Spanish, *Anis*. Italian, *Aniso*. French, *Anis*. German, *Anys*. Dutch, *Anys*.

Plate 375. *Golden Maiden-Hair. Polytrichum aureum.*

1. This Plant grows about four or five Inches high; the Leaves are a shining yellowish Brown, and the Flowers or Caps gold colour.
2. It grows on Heaths and old Arc Hills flowering in October.
3. This is one of the five Capillary Plants, and is said to be good for Coughs and all Affections of the Lungs and Diseases of the Kidneys.
4. Greek, *Πολυτρίχον*. Latin, *Polytrichum aureum majus*. Spanish, *Politrigo*. Italian, *Capel venere*. French, *Gurguet*. German, *Fraunven-Haar*. Dutch, *Venus-Hair*.

Plate 376. *Spotted Lungwort. Pulmonaria maculosa.*

1. The Stalks grow near a Foot high, the Leaves are a deep Green, and spotted above; and a pale Green without Spots underneath; and the Flowers a dull red and a blue purple on the same Stalk.
2. It is planted in Gardens, and flowers in March and April.
3. The Leaves are accounted pectoral and balsamic; good for Coughs, Consumptions, spitting of Blood, and the like Disorders of the Lungs. They are also put into Wound-Drinks and traumatic Decoctions; being agglutinating, and good to heal Wounds, Ulcers, and old Sores.
4. Greek, *Πυλμοναρία*. Latin, *Symphy maculosum, sive Pulmonaria latifolia*. Spanish, *Pulmonaria*. Italian, *Pulmonaria*. French, *Herbe aux Pulmons*. German, *Lungencraut*. Dutch, *Longekruid*.

Plate 377. *Acacia. Acacia.*

1. This grows to be a pretty big Tree; the Leaves are a bright grass Green, and the Flowers yellow. The Thorns grow on the stronger Branches.
2. It grows in the Eastern Countries particularly in Egypt.
3. The true *Acacia* of the Ancients is made from the Pods of this Tree, before they are ripe; and is accounted restraining, cooling and incrasiating, good against spitting of Blood and all kinds of Fluxes; but it is rarely to be met with in the Shops now a Days. Gum Arabick comes from this Tree, which is very serviceable in Coughs and the Heat of Urine.
4. Greek, *Ακασία*. Latin, *Acacia foliis scorpioides leguminosae*. Spanish, Italian, French, German, Dutch,

Plate 378. *Endive. Endivia.*

1. The Stalks grow about two Foot high, the Leaves are a grass Green and the Flowers blue.
2. It is sown in Gardens and flowers in June.
3. This Plant is much eat as a Sallad; and is accounted cooling & moistning, good to open obstructions of the Liver and Spleen, and help of Jaundice, provoke Urine, and cool a hot Stomach. The Seed is one of the Lesser cold Seeds.
4. Greek, *Σέγις*. Latin, *Scariola, Scriola & Intybus sativa latifolia*. Spanish, *Escarola*. Italian, *Indiva*. French, *Scariole*. German, *Endivien*. Dutch, *Endivie*.

Plate 379. *Parsnep. Pastinaca.*

1. The Stalks grow about five Foot high; the Leaves are a deep Green, and the Flowers yellow.
2. It is sown in Gardens, and flowers in July.
3. This Plant is more used in the Kitchen than the Shops; and is esteemed nourishing and a provocative to Venery. Doctor Boerhave commends it for the Strangury & the obstruction of the Menses.
4. Greek, *Στραγγίς*. Latin, *Pastinaca sativa latifolia*. Spanish, *Chirivia*. Italian, *Pastinaca*. French, *Panaïs*. German, *Pastenach*. Dutch, *Pastinaken*.

Plate 380. *Ducks-Meat. Lens palustris.*

1. This Plant consists of small round green Leaves, having neither Flower nor Seed perceivable; from the middle of each Leaf there are small white thready Roots that run down into the Water.
2. It grows on the Superficies of Ponds and Ditches.
3. It is accounted cooling and mollifying, good for Inflammations, St. Anthony's Fire, the Shingles & Gout; either applied by it self or mixt with Barley Meal. Mr Ray commends six Ounces of a strong Infusion of this Plant, made in White Wine, & taken for nine Days together, as a Cure for the Jaundice.
4. Greek, *Φάκος ὁ ἐν τῷ ὕδατι*. Latin, *Lenticula palustris vulgaris*. Spanish, *Lenteja della Goa*. Italian, *Lenticulana*. French, *Lentille d'Eau*. German, *Meer-linsen*. Dutch, *Water Linsen*.

Foeniculum graecum.

Trigonella Foeniculum graecum

Plate 385. *The greater & lesser Cardamoms & Grains of Paradyce. Cardamomum majus, minus et maximum; vel Grana Paradisi.*

1. The greater Cardamoms are long, somewhat triangular, Pods; full of corner'd, reddish brown, hot aromatic Grains; but the Tree on which they grow is not known here. They grow in the Island of Java in the East Indies. The Lesser Cardamoms are small triangular capsulae containing several corner'd brown Grains of an hot, spicy, aromatic Taste, and a pleasant Smell. They grow in the East Indies. The Grains of Paradyce, or the largest Cardamoms are of a reddish brown colour, and a hot biting Taste; but not so aromatic as the other Cardamoms; these Grains grow in roundish Pods, in shape like an unripe Fig. They grow in Guinea; but the Tree is not known here. The Fruit and Seed of these Three Cardamoms I had from M^r Joseph Millar; and the Specimen of the Tree of the Lesser Cardamoms is taken from the Malabar Garden Vol. u. Tab. 5.
2. The Seed of all these Three is said to be good to comfort and strengthen the Stomach and Bowels, help Digestion, the Jaundice and the Colic, ease Distempers of the Head and Nerves, provoke Urine and the Menses.
3. Greek, Καρδάμωμον. Latin, Cardamomum majus vulgare, Cardamomum minus vulgare, Molligetta. Spanish, Cardamomo, Grana de Paradio. Italian, Cardamomo, Cardamo. French, Cardamine, Maniguette. Grains de Paradis. German, Cardamomlein & Paradeys-Gorner. Dutch, Kleine Kardamom, & Paradys-Koorn, & Paradys grein.

Plate 386. *The Ben Nut or oily Acorn. Balanus Myrepsica.*

1. This Tree grows about Thirty Foot high; the Leaves are a deep Green on the Face and light underneath, and the Flowers white.
2. It grows in Arabia, Egypt, Syria & Barbary. The Fruit of this I had from M^r Joseph Millar; and the Tree from the Malabar Garden Vol. 6. Tab. 19.
3. The Nuts are said to purge and evacuate Bile & Flegm, upwards & downwards. The Oil is good to cure the Itch & Scabs, & to take away Freckles & Morphev.
4. Greek, Βάλανος. Latin, Nux Ben, & Glans unguentaria. Spanish, Ben. Italian, Ben. French, Ben. German, Dutch, Moringe.

Plate 387. *Indian Nut. Areca.*

1. This grows to be a large Tree, the Leaves are a grass Green & the Flowers whitish.
2. It grows in the East Indies. The Fruit of this I had from M^r Joseph Millar, and the Tree from the Malabar Garden Vol. 1. Tab. 9.
3. The Fruit is esteem'd good to strengthen the Stomach, help Fluxes, and spitting of Blood. Some recommend it as great Secret for the cure of the Kings Evil, and to rectify decayed Juices, and restore a Morbid Habit of Body.
4. Greek, Καρύνα Ποντική. Latin, Fauvel Avellana Indiana versicolor. Spanish, Avellana de la India. Italian, Avellana di India. French, Aveline d'Inde. German, Dutch,

Plate 388. *Indian Apples. Malus Indica Lusitanis.*

1. The Gum-Lac of the Shops comes from this Tree; the Leaves are like those of the Apple Tree in shape, but hoary underneath, the Flowers white striped with Green.
2. It grows in Portugal & the East Indies, and generally bears Fruit in March and September. This Specimen I had from the Malabar Garden Vol. 4. Tab. 41.
3. Gum-Lacca is accounted opening & attenuating, good to remove Obstructions of the Liver & Spleen, help the Dropsy & Jaundice, provoke Urine and purify the Blood; and is much used for making the finest Sealing Wax.
4. Greek, Ιουβία. Latin, Jujuba Indica. Spanish, Jujubo. Italian, Giuggiola. French, Jujubier. German, Brust beerlein. Dutch, Jujuben horst pruimen.

THE HISTORY OF THE UNITED STATES OF AMERICA

The first of the United States was the thirteen original states. These were the states that were the first to declare their independence from Great Britain. They were the states that were the first to form a union. They were the states that were the first to create a government. They were the states that were the first to establish a constitution. They were the states that were the first to create a nation.

The second of the United States was the thirteen original states. These were the states that were the first to declare their independence from Great Britain. They were the states that were the first to form a union. They were the states that were the first to create a government. They were the states that were the first to establish a constitution. They were the states that were the first to create a nation.

The third of the United States was the thirteen original states. These were the states that were the first to declare their independence from Great Britain. They were the states that were the first to form a union. They were the states that were the first to create a government. They were the states that were the first to establish a constitution. They were the states that were the first to create a nation.

The fourth of the United States was the thirteen original states. These were the states that were the first to declare their independence from Great Britain. They were the states that were the first to form a union. They were the states that were the first to create a government. They were the states that were the first to establish a constitution. They were the states that were the first to create a nation.

The fifth of the United States was the thirteen original states. These were the states that were the first to declare their independence from Great Britain. They were the states that were the first to form a union. They were the states that were the first to create a government. They were the states that were the first to establish a constitution. They were the states that were the first to create a nation.

The sixth of the United States was the thirteen original states. These were the states that were the first to declare their independence from Great Britain. They were the states that were the first to form a union. They were the states that were the first to create a government. They were the states that were the first to establish a constitution. They were the states that were the first to create a nation.

The seventh of the United States was the thirteen original states. These were the states that were the first to declare their independence from Great Britain. They were the states that were the first to form a union. They were the states that were the first to create a government. They were the states that were the first to establish a constitution. They were the states that were the first to create a nation.

Plate 393. *Sarsaparilla of America. Smilax aspera Peruviana.*

1. This Plant has slender prickly Stalks, the Leaves are a deep Green above and light underneath, the Flowers white with green Stamina and white Apices, and the Roots a very dark Brown; This Specimen I had from the Malabar Garden. Vol. 7. Tab. 31. and the Root from M^r. Nicholls.
2. It grows in Peru & Brasil, & flowers in August and September.
3. The Roots are heating, drying, attenuating & sudorific, & of great service in the Lues Venerea, for which it has been accounted a Specific, and much used in Diet Drinks for that Purpose. It is accounted a great sweetner of the Blood, and is serviceable for the Gout, Rheumatism, Scurvy, and King's Evil.
4. Greek, Σμύλαξ Latin, *Smilax Peruviana Sarsaparilla*. Spanish, *Sarsa-parrilla de Peru*. Italian, *Zarsa-parilla di Peru*. French, *Sarcepareille de Perou*. German, *Sarsa Parill*. Dutch, *Zalza Paril*.

Plate 394. *Bitter & Sweet Costus. Costus amarus & dulcis.*

1. The Stalks grow about four Foot high, the Leaves are a bright shining Green, the Flowers white with a yellow Apice, & a red Calix. The *Costus dulcis* is said to be the freshest Roots of this Tree, & the *Costus amarus* to be the oldest and stalest. This Specimen I had from the Malabar Garden. Vol. 11. Tab. 15. & the Roots from M^r. Nicholls.
2. It grows in Malabar in the East Indies, and flowers in May.
3. *Costus* is esteem'd hot and dry, good to comfort the Head & Stomach, and help Vertiginous Disorders. It is also a good Deobstruent, opening Obstructions of the Womb, and procuring the Catamenia. It is an Ingredient in the Theriaca; and the Electuarius *Caryocostinum*.
4. Greek, Latin, *Costus Indicus odoratus*. Spanish, *Costo amargo y dulce*. Italian, *Costo amaro & dolce*. French, *Costus Arabique*. German, *Frauwen Craut*. Dutch, *Kost Balsem*.

Plate 395. *The Nux vomica of Shops. Nux vomica in officinis.*

1. This grows to be a large Tree in the East Indies; the Leaves are a bright Green above & a deep Green underneath, and the Flowers a pale Green. This Specimen I had from the Malabar Garden. Vol. 1. Tab. 37. & the Seed from M^r. Nicholls.
2. It grows in the East Indies, and flowers in July & August.
3. Commeleijn has given a great many Virtues to the different Parts of this Tree, see the Hortus Mal. as above; but our Colleg^e of Physicians have thought y^e Nuts narcotic & poisonous; & are generally used to kill Cats & Dogs.
4. Greek, Latin, *Nuces Vomicae*. Spanish, *Neuz vomica*. Italian, *Noces vomica*. French, *Noix vomique*. German, Dutch.

Plate 396. *Turmerick. Curcuma.*

1. The Stalks of this grow about two Foot high, the Leaves are a bright Green and the Flowers red. This Specimen I had from the Leyden Garden, and the Roots from M^r. Nicholls.
2. It grows in the East Indies, and flowers in June.
3. Turmerick is accounted attenuating, apperative & warming, good to open Obstructions of the Viscera, help the Jaundice, provoke Urine & y^e Catamenia; and is useful in a Cachexia, and good to accelerate the Birth.
4. Greek, Latin, *Cyperus Indicus sive Curcuma*. Spanish, *Conna*. Italian, *Curcuma*. French, *Roseau*. German, *Gelbwurk*. Dutch, *Indiaanse Saffraan*.

James M. Smith

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some faint smudges and discoloration, characteristic of old paper. There is no text or other markings on the page.

Plate 397. *Turbith. Turpethum.*

1. This Plant shoots forth many long climbing Branches, that twist about each other, like the great Bindweed; the Leaves are a grass Green, & the Flowers a whitish Green, with yellow Stamina; & the Seed is a dark Brown. This Specimen of the Plant I had from Herman's Leyden Garden f. 179. and the Roots I did from the Life.
2. It grows in Ceylon and Malabar in the East Indies.
3. The Roots are brought to us from the East Indies, & are a pretty strong Cathartic, purging tough serous Humours from the remote Parts, which helps the Dropsy Gout & Rheumatism. The Roots are put into several of the stronger purging Compositions. The Pulvis Diaturpethi compositus takes its Name from this Root.
4. Greek, Latin, Turpethum repens foliis Altheae vel Indicum. Spanish, Turbit. Italian, Turbit. French, Turbit. German, Dutch, Turbit.

Plate 398. *The Sebesten Plumb. Sebesten & Myxa.*

1. This Tree grows about the Bigness of our Plum Trees; the Leaves are a deep shining Green above, & a dull hoary Green underneath, and the Flowers white enclosed in a Green Calix, with white Stamina & yellow Apices, with a light Green umbel in the Middle. I had this Specimen from the Malabar Garden Vol. 4. Tab. 37. and the separate Fruit I had from M^r Joseph Clutton, Apothecary.
2. It grows in Malabar in the East Indies, and is always Green, bearing Fruit in July and August.
3. The Fruit is accounted cooling & moistning, good for sharp thin Defluxions upon the Lungs, Coughs, Catarrhs, and heat of Urine.
4. Greek, Latin, Sebestena Myxa, & Myxara. Spanish, Italian, Sebestena. French, Sebesten. German, Brust Beerlein. Dutch, Borst-pruimen.

Plate 399. *Zedoary. Zedoaria.*

1. The Stalks that shoot from the Roots on which the Flowers grow are about five or six Inches long; & the Leaves a light grass Green, the Calix of the Flowers whitish, and the Flowers are stript red, white, yellow & Purple. The Stamina is purple & y^e Apice yellow. This Plant I had from the Malabar Garden Vol. 11. Tab. 9. and the separate Roots I did from the Life.
2. It grows in Malabar in the East Indies and flowers in June.
3. The Roots are esteemed heating & drying, good to warm the Stomach, expell Wind, comfort the Bowels, stop Vomiting, and ease the Collic. They are also alexipharmic, and good in all Pestilential Distempers.
4. Greek, Latin, Zedoaria longa & rotunda. Spanish, Zedoaro. Italian, Zedoario. French, Zedoaire. German, Zieuer. Dutch, Zedoar.

Plate 400. *The Emblick Myrobalan. Myrobalanus Emblica.*

1. This Tree grows about 24 Foot high, the Leaves are a dark Green above & a light Green underneath, and the Flowers white, with white Stamina and yellow Apices; and the Fruit a pale Green; both without & within. This Specimen I had from the Malabar Garden Vol. 1. Tab. 38. & the Fruit that is open and divided I did from the Life.
2. It grows in several Parts of the East Indies.
3. This Species of the Myrobalans is said to purge Phlegm at first, & afterwards Choler; and are an Ingredient in the Decoctum Epithymi.
4. Greek, Latin, Emblica. Spanish, Mirabel. Italian, Mirabolan. French, Myrobalans. German, Dutch,

Plate 401. *Myrobalans. Myrobalani.*

1. These are a Species of Plumbs, which grow in the East Indies; and as I can only find a Specimen of the Emblica, see Plate 400. I chuse to give the four other sorts of them in one Plate as I have them from the Shops.
2. They grow in Malabar in the East Indies.
3. The Citrin Plumbs are accounted good to purge Choler, and the Indicae are esteemed good to purge Melancholy; and the other Three are good to purge Phlegm at first & afterwards Choler.
4. Greek, Latin, *Myrobalanus Bellerica. Myrobalanus Chebula. Myrobalanus Citrina & flava. Myrobalanus Indica & nigra.* Spanish, *Mirabel.* Italian, *Mirabolani.* French, *Myrobalans.* German, Dutch,

Plate 402. *Zerumbet. Zerumbet*

1. This Plant is not certainly known to be the Zerumbet of the Arabians; but that the Curious may have an Opportunity of enquiring more particularly into it, I have given them one Specimen from the Malabar Garden, Vol. 11. Tab. 7 and one from Herman's Catalogue of the Leyden Garden, f. 637. It grows about 18 Inches high, the Roots are cream colour, the Stalk a whitish Green, the Leaves a deep Green above & light underneath, and the Flowers whitish.
2. It grows in Ceylon in the East Indies.
3. The Roots are commended in the Malabar Garden, as good to quench all inward Heat, purge the Reins, stop the Fluor Albus, and a Gonorrhea.
4. Greek, Latin, *Zerumbet & Zenziber silvestris.* Spanish, *Zenzevero agreste.* Italian, *Zinzero salvatico.* French, *Gingembre sauvage.* German, Dutch,

Plate 403. *Snakenwood. Colubrinum Lignum.*

1. This is thought to be a Species of the *Nux Vomica* (see Plate 395.) the Bark is ash Colour, the Leaves a dark Green, the Flowers greenish, and the Fruit Red. This Specimen is taken from Malab. Gard. Vol. 7. Tab. 5.
2. It grows in the Islands of Baybyn, Cochien and Poaha in the East Indies, and flowers in August.
3. Some commend the Roots as good for the cure of Bite of Serpents, & a tertian Ague. Yet Dr. Anton. de Heide gives it a very indifferent Character as a poisonous Thing.
4. Greek, Latin, *Lignum colubrinum primum garciae.* Spanish, Italian, French, *Bois de Serpents.* German, *Grieff-holk.* Dutch, *Slangenhou.*

Plate 404. *Gallap. Jalapium.*

1. There are several Species of this Plant, which differ only in the Colour of their Flowers, some having white Flowers, some yellow and others purple; the Leaves of all of them are a pale Green, and the Seed very black. This Specimen I took from the Malabar Garden Vol. 10. Tab. 75. and the Root I had from Mr. Nicholls.
2. It grows in Mexico and Peru.
3. The Roots are good to purge serous watery Humours, and are of great Service in the Dropsy, Gout, and Rheumatism; as also all cutaneous Disorders. The Official Preparation from the Root is, the Rosin extracted by Spirit of Wine.
4. Greek, Latin, *Jalapia, Mechoacana nigra.* Spanish, Italian, French, *Merveille du Perou.* German, Dutch, *Nagtschoon.*

Plate 405. *Female Satyrium. Satyrium foemina.*

1. This is a lower Plant than the Male, (see Plate 53.) it grows about a Foot high, the Leaves are a light grass Green without any Spots, and the Flowers a light Purple.
2. It grows in moist Meadows and flowers in May.
3. This Plant is said to have the same Virtues as the Male, being esteemed a Stimulus to Venery, a strengthener of the genital Parts, and good to help Conception; and is a Chief Ingredient in the Electuarium Diasatyrium; which is the only Official Preparation.
4. Greek, *Ορχίς* & *Αἰγερύων*. Latin, *Orchis morio foemina*. Spanish, *Cojon de Perro*. Italian, *Satirione*. French, *Satyriion*. German, *Schmal Knabencraut weible*. Dutch, *Standel kruid*.

Plate 406. *Scorzonera or Vipers-grass. Scorzonera & Viperaria.*

1. The Stalks grow about two Foot high, the Leaves are a grass Green, and the Flowers yellow.
2. It is a Native of Spain; and is planted here in Gardens, flowering in May.
3. The Root is esteemed cordial, sudorific, alexipharmic, and good in all kinds of Fevers, malignant Distempers, & the Bites or Stings of venomous Creatures.
4. Greek, *Σκωρζονέρα*. Latin, *Viperaria*. Spanish, *Scurzonera*. Italian, *Scorzonera*. French, *Scorzonere & Cercifi d'Espagne*. German, *Schlangenmord*. Dutch, *gift-wortel*.

Plate 407. *Mithridate = Mustard. Thlaspi vulgare.*

1. The Stalks grow about two Foot high, the Leaves are a deep Green, and the Flowers white.
2. It grows in Corn Fields, and flowers in May.
3. The Seed of this Plant is used instead of that of the Treacle Mustard. (see Vol. 1. Plate 68) the Virtues being much the same, & is accounted hot, dry, and diuretick, good for the Dropsy, Gout, Sciatica, & forwarding the menstrual Evacuations.
4. Greek, *Θλάπιον* & *Σίβανι*. Latin, *Thlaspi arvense Vaccariae incano folio majus*. Spanish, *Xenabe agreste*. Italian, *Taspi*. French, *Seneve Sauvage*. German, *Besencraut*. Dutch, *Wilde ofte, & Boere kers*.

Plate 408. *Alexanders. Smyrniium.*

1. The Stalks grow about four Foot high, the Leaves are a grass Green, and the Flowers a whitish Green.
2. It grows upon the Rocks along the Sea side, & flowers in May & June.
3. This Herb is much eat as a Salad, and is said to be of the Nature of Smallage or Parsley, but stronger; and therefore may be of Service to open Obstructions of the Liver and Spleen, provoke Urine and the Catamenia; and help the Dropsy and Jaundice.
4. Greek, *Σμύρνιον*. Latin, *Hipposelinum & Hipposelinum Theophrasto, seu Smyrniium Dioscoridi*. Spanish, *Apio Macedonico*. Italian, *Smirnio & Macerone*. French, *Maceron*. German, *Gross Appich*. Dutch, *Groot Peterselie*.

Plate 409. *Columbine. Aquilegia.*

1. The Stalks grow about two Foot high; the Leaves are a bluish Green, and the Flowers a fine blue.
2. It grows wild in several Places of England, & flowers in May or June.
3. The Leaves are accounted good for sore Mouths, and Inflammations of the Jaws and Throat; for which they are used in Gargarisms. The Seed is esteem'd good to open Obstructions of the Liver and Spleen; & to prevent and cure the Jaundice. Clusius commends the Seed to be given in Wine, to accelerate the Birth, and to repeat it, if there be occasion. Some use the same Medicine to drive out the small Pox and Measles.
4. Greek, *Λαζαριον*. Latin, *Aquilegia sylvestris*. Spanish, *Paxarilla agreste*. Italian, *Aquileia salvatica*. French, *Anchoisie sauvage*. German, *Agelen*. Dutch, *Akeleyen*.

Plate 410. *Sweet Naven. Napius dulcis.*

1. The Stalks grow about three Foot high; the Leaves are a grass Green, and the Flowers yellow.
2. It is sown in Gardens, and flowers in May.
3. The Ancients commend the Seed as good against all kinds of Poisons, and the Bites of Venemous Creatures; as also to provoke Urine & the Terms. Matthiolus extols it as good to expel the Malignity of all Infectious Distempers; to drive out the small Pox and Measles & clear the Heart. It is an Ingredient in the *Theriaca Andromachi*.
4. Greek, *Βουβίαν*. Latin, *Bunias*. Spanish, *Nabicas*. Italian, *Navone & Nagine*. French, *Navet*. German, *Stechtruben*. Dutch, *Stek-raap & Parysche-raap*.

Plate 411. *Hedge-Hysop. Gratiola.*

1. The Stalks grow about a Foot high; the Leaves are a light grass Green, and the Flowers a pale yellow, next the Calix, & a light Purple at the Top.
2. It is a Native of Italy, & is planted here in Gardens & flowers in June.
3. Some Writers commend this Plant as a good Purger of serous and choleric Humours; and serviceable against the Dropsy and Jaundice, but it is of a rugged churlish Nature.
4. Greek, *Γράτιολα*. Latin, *Gratiola centauroides*. Spanish, *Hissopo agreste*. Italian, *Gratiola*. French, *Gratiolle*. German, *Bild Aurin*. Dutch, *Gods-genade*.

Plate 412. *Fleawort. Psyllium.*

1. The Stalks grow near a Foot high, the Leaves are a deep Green, and the Flowers a greenish Brown.
2. It is a Native of France, & is planted here in Gardens flowering in June.
3. The Seed is used to extract a Mucilage for sore Mouths & Throats and to help Thrushes & Quinsys. It is also used to obtund sharp acrimonious Humours which corrode the Bowels and cause Dysenteries. Outwardly it is good for sore inflamed blood-shot Eyes.
4. Greek, *Ψύλλιον*. Latin, *Psyllium majus erectum*. Spanish, *Zargatona*. Italian, *Psillio*. French, *Herbe aux Pucet*. German, *Psillen-craut*. Dutch, *Dloo-kruid*.

[Faint, illegible text, likely bleed-through from the reverse side of the page. The text is arranged in several paragraphs and is too light to transcribe accurately.]

Plate 413. *Burnet. Pimpinella.*

1. The Stalks grow about a Foot high, the Leaves are a deep Green above and light underneath; and the Flowers reddish.
2. It grows on Banks and Meadows, flowering in June.
3. Burnet is esteemed heating, drying, cordial and alexipharmic; and is often put into Wine, in the Summer, to give it a fine Flavor. The Powder of the Herb, or Root, is used for spitting of Blood, Bleeding at the Nose, or any other Flux or Haemorrhage. A Decoction of the Plant is accounted good for the Stone and Gravel. The Herb applied outwardly is good to stay the Bleeding of Wounds and promote their Cure.
4. Greek, Πιμπινέλη. Latin, *Sanguisorba*, & *Pimpinella sanguisorba minor*. Spanish, *Italian, Pimpinella. French, Pimpinelle. German, Bibernell. Dutch, Pimpernelle.*

Plate 414. *Orris. Iris Florentina.*

1. The Stalks grow about two Foot high, the Leaves are a light grass Green, and the Flowers whitish.
2. It grows wild about Florence in Italy, but is nursed here in Gardens flowering in May.
3. The Roots only are used, being attenuating emollient & pectoral, good for Disorders of the Lungs, caused by sharp Humors falling on the tender Vesiculae. They help Coughs, Hoarseness & soreness at the Stomach; and are commended against the Gripes in Children; and to bring down the Obstructed Menses. Outwardly it is used in Perfumes, Sweet Bags & Hair Powder. It is an Ingredient in the Theriaca Andromachi, & Mithridate.
4. Greek, Ἰρίς. Latin, *Illyrica. Iris alba Florentina. Spanish, Liria blanca de la Florencia. Italian, giglio celeste. French, glaycul blanche de la Florence. German, Gilgen. Dutch, Lich.*

Plate 415. *Horse-radish. Raphanus sylvestris.*

1. The Stalks grow about three Foot high, the Underleaves are a deep grass Green, and the upper Leaves a light grass Green, & the Flowers are white.
2. It is planted here in Gardens, and flowers in May.
3. The Root is heating drying and aperitive, & is frequently used in Sauces to create an Appetite. It is often used in Dyet Drinks, for the Scurvy, Dropsy and Jaundice, & is the Chief Ingredient in the Aqua Raphani composita.
4. Greek, Ράφανις, & Ράφαν & Ράφανος ἄγρια. Latin, *Raphanus rusticanus. Spanish, Rabano agreste. Italian, Ravanofagia. French, Raifort sauvage. German, Rettig. Dutch, Radys.*

Plate 416. *Adders=tongue. Ophioglossum.*

1. This Plant consists of One small Leaf, of a grass Green Colour without Ribs or large Veins, about four Inches high; from the Bosom of which arises a Stalk about two Inches high, bearing on its Top a slender crenated Tongue about an Inch long in which the Seed is contained.
2. It grows in moist Meadows, and is in its Prime in May.
3. This is a good vulnerary Plant, given inwardly either in the Juice or the Powder, for Bruises or Wounds; and outwardly boil'd in Oil, for fresh Wounds Ulcers Bruises and Inflammations.
4. Greek, Οφιογλωσσόν. Latin, *Ophioglossum vulgatum. Spanish, Italian, Lingua Serpentina. French, Langue de Serpent. German, Ratten=junglein. Dutch, Adders-tong.*

Plate 417. *The Caper Bush. Capparis.*

1. This Bush has many trailing Branches; the Leaves are a grass Green, & the Flowers Red with yellow Apices.
2. It grows in the Southern Parts of France, and Italy; flowering in May.
3. The Capers that we use in Pickle are the Buds of the Flower; which are laid in the Sun to dry for a Day, and afterwards are put into Vinegar for eight Days, at which time they are shifted; this they repeat, and then they are barreld up for Use. Capers are accounted good to create an Appetite, provoke Urine, and help the Spleen and Jaundice. The Bark of the Root is heating and drying; opens Obstructions of the Liver & Spleen, helps the Rickets and hypochondriac Disorders.
4. Greek, Κάτωραγίς. Latin, *Capparis spinosa*, fructu minore, folio rotundo. Spanish, Alchapparras. Italian, Capparo. French, Cappellet. German, Capren. Dutch,

Plate 418. *Mother of Thyme. Serpyllum.*

1. The Stalks grow about a Foot high, the Leaves are a bright grass Green, and the Flowers a reddish Purple.
2. It grows on Heaths and Commons, and flowers in July.
3. This Plant is esteem'd cephalic, stomatic and uterine, good for the Palsy, Epilepsy, and Green Sickness, promoting the Catamenia. Some commend it for Catarrhus Defluxions, old Coughs and spitting of Blood. The Distill'd Oil is good for the Tooth Ach.
4. Greek, Ερσιλλός. Latin, *Serpyllum vulgare minus*. Spanish, Serpollio. Italian, Serpillo. French, Serpulet. German, Duendel. Dutch,

Plate 419. *Savory. Satureia.*

1. The Stalks grow about nine Inches high, the Leaves are a grass Green, and the Flowers a pale Purple.
2. It is sown here in Gardens, and flowers in June.
3. Savory is heating drying and carminative, good to expel Wind from the Stomach and Bowels, help an Asthma and other Affections of the Breast. It is also good to open Obstructions of the Womb, & promote the Menses.
4. Greek, Θυμύρα. Latin, *Satureia hortensis*. Spanish, Agedrea. Italian, Savoreggia & Satureia. French, Sarricte. German, Satureon. Dutch, Boon-kruyd.

Plate 420. *Moonwort. Lunaria.*

1. It grows about four Inches high, the Leaves are a light grass Green, and the Heads that contain its dusty Seed of a brownish Green.
2. It grows in dry hilly Pastures, particularly in the Warren by Woodvich in Kent, and is in perfection in May.
3. Some People extoll this Plant much, as good for all sorts of Wounds; in Wales they make an Ointment of it, which applyed to the Reins, they reckon a Sovereign Remedy for a bloody-Flux.
4. Greek, Latin, *Lunaria minor*. Spanish, Lunario. Italian, Lunaria del grappolo. French, Linaire. German, Monkraut. Dutch, Maan-kruyd.

THE FIRST PART OF THE HISTORY OF THE
LIFE OF THE LATE LORD OF THE TREASURY
OF THE KINGDOM OF GREAT BRITAIN
AND IRELAND
BY
JAMES OAKLEY, ESQ.
OF THE BARR

IN TWO VOLUMES.
THE SECOND VOLUME.
LONDON:
PRINTED BY J. JOHNSON, ST. PAUL'S CHURCH-YARD, 1794.

THE SECOND PART OF THE HISTORY OF THE
LIFE OF THE LATE LORD OF THE TREASURY
OF THE KINGDOM OF GREAT BRITAIN
AND IRELAND
BY
JAMES OAKLEY, ESQ.
OF THE BARR

IN TWO VOLUMES.
THE SECOND VOLUME.
LONDON:
PRINTED BY J. JOHNSON, ST. PAUL'S CHURCH-YARD, 1794.

Plate 421. *The Leek. Porrum.*

1. The Stalk grows about three or four Foot high; the Leaves are a bluish Green, and the Flowers a pale greenish Purple.
2. It is sown in Gardens and flowers in June and July.
3. Leeks are more used in the Kitchen than in the Shops. They are esteemed warming and attenuating, good to cleanse the Lungs from tough Phlegm, help shortness of Breath and stoppage of the Stomach. The Juice is used to dissolve the Gums in the *Pilulae foetidae*.
4. Greek, *Πράσον*. Latin, *Porrum commune capitatum*. Spanish, *Puerro*. Italian, *Porro*. French, *Porreau*. German, *Lauch*. Dutch, *Parei*.

Plate 422. *Oats. Avena.*

1. The Stalks grow about four Foot high, the Leaves are yellowish when ripe, and the Flower is Green.
2. It is sown in the Fields in March or April, and is ripe in July and August.
3. Oats are restraining and drying; and Oatmeal is of great Service both in Health and Sickness, being an wholesome and cleansing Food. Water Gruel made thereof is much used in all Kinds of Distempers. Oats fried and put into a Bag, and applyed to the Side, are good to ease pleuretic Pains; and applyed to the Belly they help the Colic and Pains in the Bowels.
4. Greek, *Βρώμη*. Latin, *Avena vulgaris seu alba*. Spanish, *Avena*. Italian, *Vena & Gena*. French, *Avoine*. German, *Habern*. Dutch, *Haver*.

Plate 423. *Barley. Hordeum.*

1. The Stalks grow about two or three Foot high, the Leaves are yellowish when ripe, and the Flowers a pale Green.
2. It is sown in the Spring and is ripe in July.
3. Barley is made into Bread in some Countries, & is much used by $\frac{1}{2}$ Brewer and the Distiller. It is accounted cooling, mollifying & cleansing; a Decoction of it is of great Service in all kinds of Fevers & inflammatory Distempers, the Stone, Gravel, Heat and sharpness of Urine. Barley Broth is esteemed the best Nourishment in Acute Diseases. The *Pisania*, so much commended by ancient Physicians, was made of huskd Barley, boiled so long in Water till the Barley crack'd, and the Liquor became thick like Cream.
4. Greek, *Κριθή*. Latin, *Hordeum distichum*. Spanish, *Cevada*. Italian, *Orzo*. French, *Orge*. German, *Gersten*. Dutch, *Gerst*.

Plate 424. *Rye. Secale.*

1. The Stalks grow about four or five Foot high, the Leaves are a pale yellow when Ripe, and the Flowers a pale Green.
2. It is sown in October and is ripe in July.
3. Rye is more used for Bread than Medicine; and is apt to gripe those that are not used to it. The Farina is sometimes prescribed outwardly in Cataplasms against Tumors and Inflammations.
4. Greek, *Σείτο*. Latin, *Siligo*. Spanish, *Centeno*. Italian, *Segala*. French, *Seigle*. German, *Rotten Korn*. Dutch, *Rogge*.

Plate 425. *The Black Cherry. Cerasus nigra.*

1. This grows to be a pretty tall Tree; the Leaves are a deep grass Green, and the Blossoms white.
2. This Tree grows wild in several Parts of England, and flowers in April.
3. The Fruit is accounted cordial and cephalic and useful in all Diseases of the Head and Nerves, as Epilepsy, Convulsions & Palseys. Some commend it for the Stone, Gravel & Stoppage of Urine. The Official Preparation is, the Distill'd Water, which is more used now than any other Simple Water.
4. Greek, Κεράσια. Latin, *Cerasus major ac sylvestris fructu subdulci nigro colore inficiente.* Spanish, Guindo. Italian, Cirege. French, Cerisier. German, Fin Gersch-Baum. Dutch, Kerve-boom.

Plate 426. *Siler Mountain. Seseli.*

1. The Stalks grow about four or five Foot high, the Leaves are a light grass Green, and the Flowers white.
2. It is a Native of the Alps, and flowers in June.
3. The Herb and Seed are used, being esteem'd heating and drying, good to provoke Urine and the Menses, expell the Birch & After-Birth and help Disorders of the Head and Womb. The Seeds are put into the Theriaca and Mithridate.
4. Greek, Σίσελι. Latin, *Siler Montanum.* Spanish, Sesamo. Italian, Seseli. French, Sesame. German, Steinbreck. Dutch, Esels Commyn.

Plate 427. *Eye-bright. Euphrasia.*

1. The Stalk grows about eight Inches high, the Leaves are a deep Green and the Flowers white, with a yellow Spot in the Middle, and several black Stripes running lengthways.
2. It grows in Fields and Commons flowering in July.
3. This Plant is famous for all Disorders of the Eyes, especially for Dimness of Sight; and to strengthen it, when weak or decayed, either given in the Juice, or Decoction; or the Powder of the Leaves. A Powder made of two Ounces of Eyebright, and half an Ounce of Mace is very much commended for the above Ends; especially after proper Evacuations. Some esteem it good for the Jaundice. The Official Preparation is, the Aqua Euphrasiae.
4. Greek, Εὐφροσύνη. Latin, *Euphrasia, & Euphrasia officinarum.* Spanish, Eufrasia. Italian, Eufragia. French, Eufraise. German, Augencrost. Dutch, Oogen-croost.

Plate 428. *The lesser House-leek. Sedum minus.*

1. The Stalks grow about six Inches high, the Leaves are a bluish Green, and the Flowers white.
2. It grows on old stone Walls & Buildings, flowering for several Months in Summer.
3. The Leaves & Stalks are accounted cooling, & good for all Kinds of Inflammations. This is the Sedum that ought to be put into the Unguentum Populeon.
4. Greek, Ακίζιον μικρόν. Latin, *Vermicularis.* Spanish, Semperviva menor. Italian, Sempervivo minore. French, Joubarbe petite. German, Klein Hauss-wurk. Dutch, Kleine donderbaart.

THE LATEST

The latest news from the front is that the British have taken the town of Ypres. This is a great victory for the Allies, as it is a strategic position. The British have also captured a large number of German prisoners and a great deal of military equipment. The German army is now in a very difficult position, and it is expected that they will soon be forced to retreat.

THE LATEST

The latest news from the front is that the British have taken the town of Ypres. This is a great victory for the Allies, as it is a strategic position. The British have also captured a large number of German prisoners and a great deal of military equipment. The German army is now in a very difficult position, and it is expected that they will soon be forced to retreat.

Plate 429. *The Vetch. Vicia.*

1. The Stalk grows about three Foot long, the Leaves are a bluish Green, and the Blossoms Purple.
2. It is sown in Fields, and flowers in May.
3. Tares are seldom used now in the Shops, altho the Vulgar boil them in Milk, and give the Decoction to drive out the small Pox and Measles. Matthiolus says they are good to provoke Urine & help a Consumption, if they are boiled, and eat, in Barley Broth.
4. Greek, Βίκιον. Latin, *Vicia sativa vulgaris, semine nigro.* Spanish, Algarroba. Italian, Vicia. French, Vesce. German, Wicken. Dutch, Wikken.

Plate 430. *Toothwort. Dentaria.*

1. The Stalks grow about six Inches high, and the Flowers are Purple.
2. It grows in Mossy Ground at the Roots of Trees.
3. This Toothwort is accounted by Matthiolus, binding, cooling and cleansing, and good to promote Sleep. The Water distilled from the Roots, he extolls as good for all sorts of Fluxes and the Epilepsy. Gerard says & Country People used this Plant for Coughs, and all Disorders of the Lungs.
4. Greek, Αρνικον. Latin, *Dentillaria.* Spanish, Italian, French, Dentaire. German, Onblat Schupenwurk. Dutch,

Plate 431. *Mugwort. Artemisia.*

1. The Stalks grow about three Foot high, the Leaves are a deep Green above and hoary underneath, and the Flowers a purplish Yellow.
2. It grows in Hedges and waste Places, flowering in June.
3. The Leaves are chiefly used, especially against Distempers incident to the Female Sex, being of great service in promoting the menstrual Evacuations, either taken inwardly, or used outwardly in Baths & Semicupia. Some Recommend this Plant as good to strengthen the Head & Nerves, & help hysteric Fits or Vapours. The Moxa, so famous in the Eastern Countries for curing the Gout by Burning, is the Down of a lesser Species of Mugwort, viz the *Artemisia Chinensis* cujus Mollugo Moxa dicitur. See Plate of Phytograph. Tab. 15. Fig. 1. The Official Preparation is the Sympus *Artemisia.*
4. Greek, Αρτεμισία. Latin, *Artemisia vulgaris major.* Spanish, Artemisia. Italian, Artemisia. French, Armase. German, Benfuss. Dutch, Bywort.

Plate 432. *Rosa-solis. Ros Solis.*

1. The Stalks grow about four Inches high, the Leaves are a grass Green covered with red Hairs, and the Flowers white.
2. It grows in Boggy Grounds, and flowers in June and July.
3. It is accounted by some a great Cordial, good for Consumptions, Convulsions and the Plague. Formerly a Cordial Water, in which this Herb was a chief Ingredient, was in great Rapute under the Name of *Rosa Solis*; but now it is almost out of Date.
4. Greek, Latin, *Ros Solis folio rotundo.* Spanish, Rosolis. Italian, Rosa Solis. French, Rosee du Soleil. German, Sonner-shau. Dutch, Zonne-daun.

Plate 433. *West India China. China occidentalis.*

1. This Plant whose Root is the China, is a Species of prickly Bindweed; the Stalks grow about fifteen Foot high, when they have Trees to climb up. The Leaves are a deep grass Green and the Flowers a greenish yellow.
2. It grows in Jamaica and other Parts of the West Indies.
3. China Roots are esteem'd sudorific and hepatic, good for the Gout, Dropsy, King's Evil and the Lues Venerea. Some Physicians prefer this to the Oriental China, especially in Scrophulous Cases and Consumptions, where there are any Suspicion that they arise from a Scrophulous Cause.
4. Greek, Σμίλαξ τριχέλις. Latin, *Smilax aspera*, fructu nigro, radice nodosa magna, laevi, farinacea, China dicta. Spanish, *Volubiles aspero de las Indias occidentales*. Italian, *Smilace aspro di Indie occidentale*. French, *Volubilis aspre de l'Indie occidentale*. German, *Scharpffe Binden*. Dutch, *China-Wortel*.

Plate 434. *Hercules's Allheal. Panax Herculeum.*

1. The Stalks grow about six or eight Foot high, the Leaves are a yellowish Green and the Flowers yellow.
2. It is a Native of Syria, and flowers in June.
3. The Gum opponax is said to come from the wounded Root of this Plant; and is accounted heating & dissolving, good to evacuate tough Phlegm from the remote Parts of the Body, & on that account is useful against old Coughs and Asthmas; it helps the Gout, Sciatica, & Rheumatic Pains in the Limbs, and procures the Catamenia. Outwardly applyed it is good to dissolve hard Swellings, Tumors, pestilential Buboos, & Cure the Bittings of Venemous Creatures.
4. Greek Πάναξ ἡπακτέριον. Latin, *Panax Pastinacae folio*. Spanish, *Panacea de Hercules*. Italian, *Panace Heractio*. French, *Panacee de Hercule*. German, Dutch,

Plate 435. *Ladies Bedstraw. Gallium.*

1. The Stalks grow about two Foot high, the Leaves are a deep grass Green, and the Flowers a bright Yellow.
2. It grows on Banks and dry Barren Places, flowering in June & July.
3. Yellow Bedstraw is accounted drying and incrasiating, good to stop all kinds of Fluxes & Haemorrhagies, and cure green Wounds. Some commend a Decoction of it for the Gout, and a Bath of it is very refreshing to wash the Feet after overwalking.
4. Greek, Γάλιον. Latin, *Gallium luteum*. Spanish, *Coaja leche Yerva*. Italian, *Galio*. French, *Petit Muguet*. German, *Meger Kraut*. Dutch, *Dal-stroo*.

Plate 436. *Gromill. Lithospermum.*

1. The Stalks grow about two Foot high, the Leaves are a grass Green, and the Flowers white.
2. It grows in dry Fields and Hedges, flowering in May.
3. The Seed is esteem'd a great diuretic, & a Cleanser of the Reins and Ureters, and good against the Stone, Gravel, Stoppage & Heat of Urine, as also a Gonorrhea. It is generally boild in Wine or Water. Matthiolus commends two Drams of the Powder to be given in Women's Milk, as a speedy help in hard Labour.
4. Greek, Λιθόσπερον, μικρόν. Latin, *Lithospermum majus erectum*. Spanish, *Myo del Sol*. Italian, *Miglio salvatico*. French, *Gremil*. German, *Stein-jamen*. Dutch, *Paarel-Zaad*.

1890

the first year of my life, I was a very poor child.

1890

the present one is a blank. The other two are completely blank.

Plate 437. *The smaller Tobacco. Nicotiana minor.*

1. The Stalks grow about three Foot high, the Leaves are a deep grass Green, and the Flowers a pale Yellow.
2. It is sown in Gardens, flowering in June and July.
3. This Tobacco is not so much used as the other See Plate 146. being esteemed to have less Virtue; but has much the same Qualities as the former, only in a less Degree. The Herb Women frequently impose the Leaves of this Plant for those of the Mandragora; See Plate 364. on their unwary Customers. amarillo.
4. Greek, Τοκβάμ & μῆλινος. Latin, *Hyoscyamus luteus*. Spanish, Velenho, Italian, Jusquiamo maggiore. French, Jusquiame. German, Bundkraut. Dutch, Dolkruyd.

Plate 438. *Goldy-Locks. Stoechas citrina*

1. The Stalks on which the Flowers grow are about a Foot high, the Leaves are a light willow Green, and the Flowers a bright Yellow.
2. It grows in the Southern Parts of France & Italy, and is planted here in Gardens, flowering in July and August.
3. This Stoechas is accounted good for Obstructions of the Liver and Spleen; it helps to dissolve congealed Blood and to provoke Urine. Matthiolus gives it great Commendations; but it is but seldom used in our Shops.
4. Greek, Ελίσχυρος. Latin, *Elichrysium*, seu *Stoechas citrina angustifolia*. Spanish, Cantueso. Italian, Amaranzo giallo. French, Amaranthe jaune. German, Reinblumen. Dutch, *Staechas citrina*.

Plate 439. *Ox-Eye. Buphthalmum.*

1. The Stalks grow about two Foot high, the Leaves are a deep grass Green, and the Flowers yellow.
2. It grows wild in some Parts of England, & flowers in June and July.
3. Dioscorides says, That in his time, it was accounted good for the Jaundice, and to restore the Skin to its Colour, if the Decoction of it was taken, after coming out of a Bath. The Ox-Eye that is commonly used in the Shops is the *Bellis major*; See Plate 42.
4. Greek, Βόφθαλμον. Latin, *Buphthalmum Cotulae folio*. Spanish, Margaza. Italian, Occhio di Bue. French, Oeil de Bœuf. German, Kinds Aug. Dutch, Koodil.

THE HISTORY OF THE

The first part of the history of the world is the history of the creation of the world and the history of the world from the creation of the world to the present time. The second part of the history of the world is the history of the world from the present time to the future.

THE HISTORY OF THE

The third part of the history of the world is the history of the world from the future to the end of the world. The fourth part of the history of the world is the history of the world from the end of the world to the beginning of the world.

THE HISTORY OF THE

The fifth part of the history of the world is the history of the world from the beginning of the world to the present time. The sixth part of the history of the world is the history of the world from the present time to the future.

THE HISTORY OF THE

The seventh part of the history of the world is the history of the world from the future to the end of the world. The eighth part of the history of the world is the history of the world from the end of the world to the beginning of the world.

Plate 441. *Coloquintida. Colocynthis.*

1. This Plant grows much like the Water Melon, its Leaves are a light grass Green, and the Flowers a pale Yellow.
2. It grows in Turkey, and flowers in June.
3. Coloquintida is one of the strongest purging Simples, used in the Shops; it carries off serous Humors & tough Phlegm from all Parts of the Body, with pretty much Violence, and is generally attended with griping, Nausea and some times Vomiting. But when given with proper Correctives, it is serviceable in all Pains of the Head & Nerves, helps the Rheumatism, Gout & Dropsy; and promotes the Menses. The Official Preparation is, The Trochisci Alhandal.
4. Greek, Κολοκυνθίς. Latin, *Colocynthis fructu rotundo, minor.* Spanish, Coloquintida. Italian, Coloquintida. French, Coloquinte. German, Coloquinch. Dutch, Koloquint.

Plate 442. *The German Anomum. Anomum vulgare.*

1. The Stalks grow about two Foot high, the Leaves are a bright grass Green, and the Flowers white.
2. It grows in Ditches and Banks, flowering in June & July.
3. The Seed is one of the four lesser Hot Seeds used in the Shops; and is accounted drying & attenuating, good to open Obstructions, cleanse & Reins of Gravel, & promote the Menstrua. It is also esteem'd alexipharmic, for which it is put into & Theriaca Andromachi, for a Succedaneum to the true Anomum.
4. Greek, Σίσων. Latin, *Sison, quod Anomum Officinis nostrum.* Spanish, Apio. Italian, Petroselino Macedonico. French, Persil de Macedoine. German, Welscher Petersilien. Dutch, Peterselie van Macedonien.

Plate 443. *Smallage. Apium.*

1. The Stalks grow to be two or three Foot high, the Leaves are a bright grass Green, and the Flowers yellow.
2. It grows in Marshy Places, flowering in June & July.
3. The Root is one of the five opening Roots, used in the Shops; and is account'd diuretic, and good for the stoppage of Urine, the Stone, the Gravel, Obstructions of the Liver & Spleen, the Dropsy, the Jaundice, & Obstructions of the Menses. The Leaves have much the same Qualities, and are eaten in the Spring to sweeten and purify the Blood, & help the Scurvy. The Seed is one of the four lesser hot Seeds used in the Shops; & is esteem'd carminative.
4. Greek, Ελεοσέλιον. Latin, *Eleoselinum.* Spanish, Perecil d'agua. Italian, Apio aquatico. French, Persil de Leau. German, Eppich. Dutch, Tuffroun. Merk.

Plate 444. *The lesser Burdock. Xanthium.*

1. The Stalk grows about a Foot high, the Leaves are a dull yellow Green, and the Flowers a dull brownish Green.
2. It grows in rich fat Soils, and flowers in June & July.
3. Some commend this Plant for Scrophulous Tumors, the Juice being taken inwardly, and the Leaves applyed to the Swellings. Matthiolus extols it much, as good for the Leprosy.
4. Greek, Ξάνθιον. Latin, *Bardana minor.* Spanish, Lappa menor. Italian, Lappa minore. French, Grapellas. German, Bittergleyß. Dutch, Kleine Klitten.

The above given account of the
 origin and the history of the
 system for treatment of the
 disease in question is intended to be
 a general one, and not a detailed
 one. It is intended to show the
 general principles of the system, and
 the general results of its application.
 The details of the system, and the
 results of its application, will be
 given in the next chapter.

[The page contains extremely faint, illegible handwriting, likely bleed-through from the reverse side.]

Plate 445. *Tormentill. Tormentilla.*

1. The Stalks grow about six Inches high: the Leaves are a bright grass Green, and the Flowers yellow.
2. It grows on Commons and in Woods: flowering in July.
3. The Roots are esteem'd drying, binding and alexipharmic, & good for Diarrhaeas and Dysenteries, especially attended with malignant Fevers. They are also serviceable in Haemorrhagies of the Nose, Mouth or Womb: fasten loose Teeth, and help the falling of the Uvula.
4. Greek, Επτάφυλλον. Latin, *Heptaphyllum*. & *Tormentilla sylvestris*. Spanish, *Siete en Rama*. Italian, *Tormentilla*. French, *Tormentille*. German, *Tormentill*. Dutch, *Tormentille*.

Plate 446. *Mustard. Sinapi.*

1. The Stalk grows about three Foot high, the Leaves are a grass Green, and the Flowers yellow.
2. It grows in Waste Places and amongst Rubbish, and is cultivated also in Gardens, flowering in June.
3. The Seed of this Plant is what makes the Common Sauce call'd Mustard, which is a wholesome Condiment, provoking an Appetite, strengthening the Stomach, and helping Digestion: it is also good for the Head, Apoplexy, Lethargy & Palsy, especially of the Tongue. The Seed bruised & infused in Wine or Ale is of great service for the Scurvy and Dropsy, provoking Urine and the Menstrues. Outwardly applyed it is drawing and ripening: & laid on paralytic Members it recalls the Natural Heat.
4. Greek, Σινωπι. Latin, *Sinapi Rapi folio*. Spanish, *Xenabe ó Xenable*. Italian, *Senapa*. French, *Seneve*. German, *Senff*. Dutch, *Mostert*.

Plate 447. *Bishop's Weed. Ammi vulgare.*

1. This Plant grows about three Foot high, the Leaves are a bright grass Green, and the Flowers white.
2. It is rarely found wild in England; altho' Parkinson says it grew wild at Greenwich in Kent: it flowers in June.
3. The Seed is one of the four lesser hot Seeds, used in the Shops; and is accounted drying & warming, good to expell Wind from the Stomach & Guts, and prevent the Collick. It is also diuretic, and helps to provoke Urine and the Courses.
4. Greek, Αμμι. Latin, *Ammi majus*. Spanish, *Ammi*. Italian, *Ammi*. French, *Ammi*. German, *Amei*. Dutch, *Ammi*.

Plate 448. *Dittander or Peppervort. Lepidium & Peperitis.*

1. The Stalks grow about two Foot high, the Leaves are a bluish Green, and the Flowers white.
2. It grows in moist Places near Rivers, flowering in June and July.
3. The Leaves bruised and mix'd with Hogs Lard, and applyed as a Cataplasme to the Hip, are accounted good for the Sciatica: when chew'd, they cause a great Flux of Rheum to run out of the Mouth, which they esteem good for Scrophulous Tumours in the Throat. The Women in Suffolk give them boiled in Ale to hasten the Birth.
4. Greek, Νεωίδιον. Latin, *Lepidium latifolium*. Spanish, *Pimiento ó Nasturcio*. Italian, *Piperite*. French, *Passerage ou Poivre*. German, *Pfeffer Kraut*. Dutch, *Peper kruid*.

THE THEATRE OF THE WORLD
A HISTORY OF THE THEATRE
FROM THE EARLIEST TIMES
TO THE PRESENT
BY
J. H. WATSON
LONDON
1874

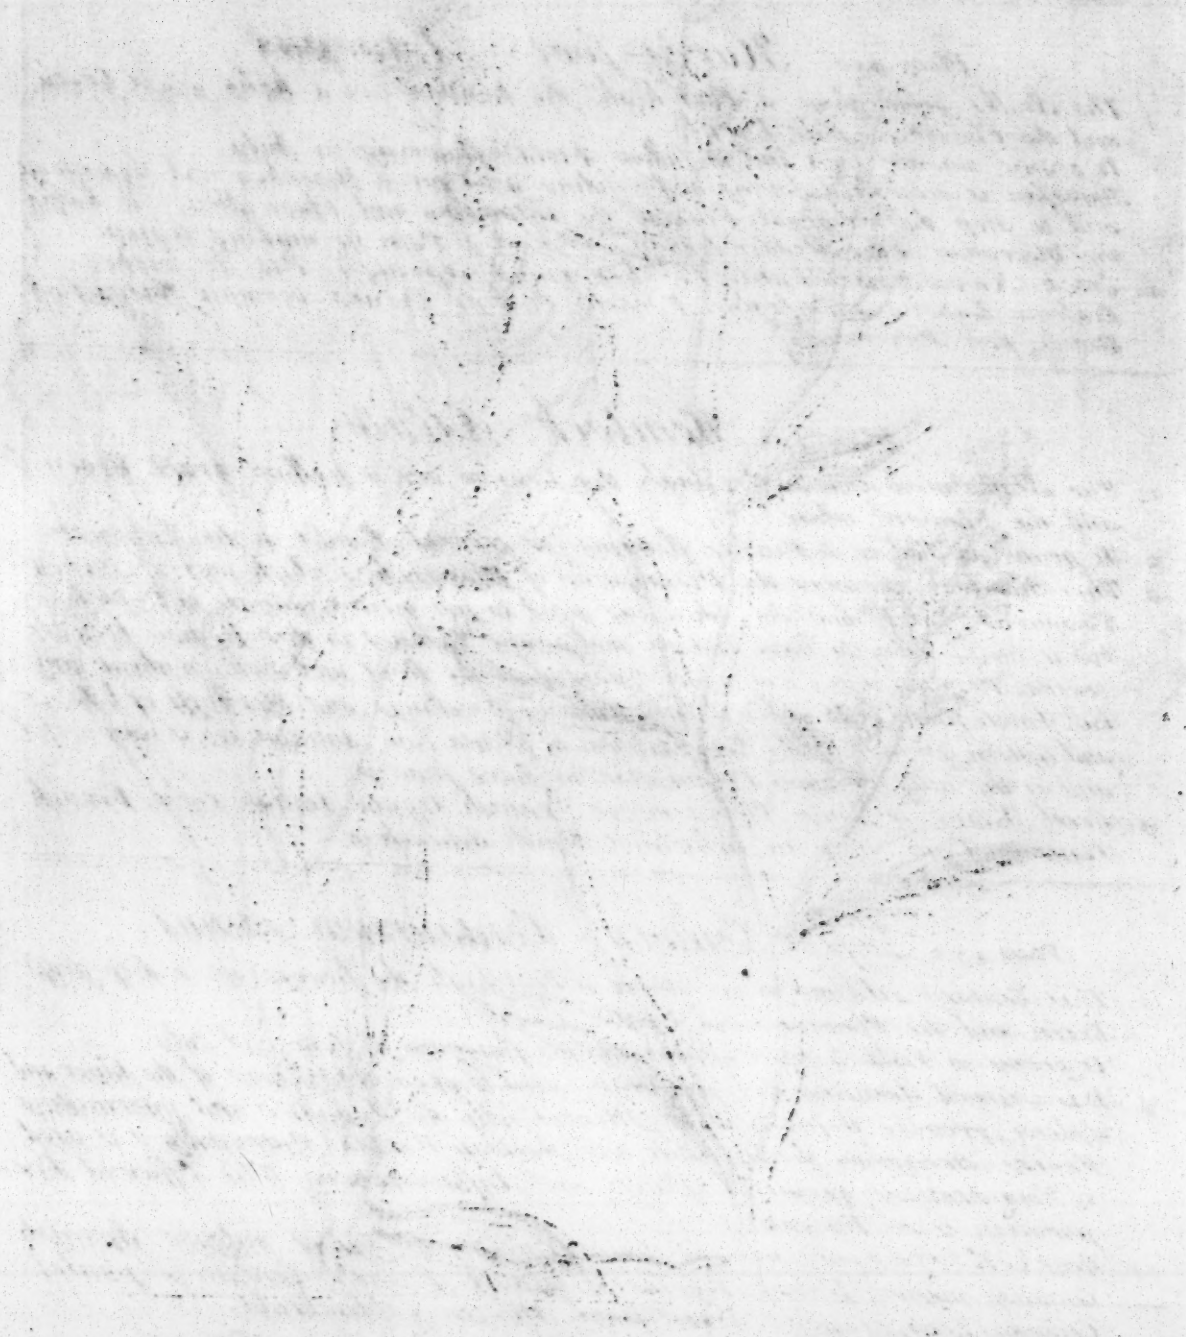

Plate 449. *Red-Cherry. Cerasus rubra.*

1. This Tree never grows so big as the Black Cherry (see Plate 425) the Leaves are a grass Green, and the Blossoms white.
2. It is planted in Gardens, flowering in April.
3. The Fruit is esteem'd more cooling than the Black, and is gratefull to the Stomach, quenching Thirst and wheting the Appetite. The Gum is accounted Lichontriptic, and good for the Stone and Gravel.
4. Greek, Κεράσια. Latin, *Cerasa sativa rotunda, rubra & acida.* Spanish, Guindo. Italian, Ciregio e Ceraso. French, Cerisier. German, Fin Kerschbaum. Dutch, Kerse boom.

Plate 450. *Hares-foot. Lagopus.*

1. The Stalks grow about a Foot high, the Leaves are a light grass Green, and the Flowers a pale Purple.
2. It grows among Corn and in fallow Fields, flowering in July.
3. Haresfoot is accounted drying and binding, good for a Diarrhea and Dysentery, and to stop the too great Flux of the Catamenia and Fluor Albus. It helps the Ulceration in the Bladder, & allays the Heat & Pain in making Water.
4. Greek, Λαγώπους. Latin, *Pes Leporinus.* Spanish, Pie de Liebre. Italian, Lagobo, e Trifoglio. French, Pied de Lièvre. German, Hasen-fuß. Dutch, Gen Hazemont.

Plate 451. *Hemlock. Cicuta.*

1. The Stalks grow about six Foot high, the Leaves are a yellow grass Green, and the Flowers white.
2. It grows in Hedges & Ditches, flowering for several Months in the Summer.
3. This Hemlock answers the Description of Dioscorides's, which was of such a Poisonous Nature that the Athenians used to put their Criminals to Death by it; but it would seem to have lost its malignant Qualities in this Region, because several Persons have eat some Quantity of the Root and Stalk, without any bad Consequence. It is used outwardly in Swellings, and Hardness of Liver and Spleen; for which the Emplastrum de Cicuta cum Ammoniaco, is very useful, and is the only Official Preparation we have from it.
4. Greek, Κόρυμβος. Latin, *Cicuta major.* Spanish, Ceguta. Italian, Cigue. French, Cigne ou Cigue. German, Schirlnict. Dutch, Scheerling.

Plate 452. *Lesser Centory. Centaurium minus.*

1. This Centory seldome grows above a Foot high, the Leaves are a deep grass Green, and the Flowers a red Purple.
2. It grows in Fields & dry Pasture Grounds, flowering in June and July.
3. It is esteem'd cleansing and apperative, good to open Obstructions of the Liver and Spleen, provoke Urine, and the Menses, help the Jaundice and intermitting Fevers, strengthen the Stomach and destroy Worms. Outwardly it is used in Fomentations against Swellings and Inflammations. The Official Preparation is an Extract.
4. Greek, Κενταύριον μικρόν. Latin, *Centaurium minus vulgare.* Spanish, Centaura menor. Italian, Centaurea minore. French, Centaurée poulet. German, Zansent-gulden kraut. Dutch, Duizen-gulden kruid.

Plate 453. *The Pear-tree. Pyrus.*

1. There are several kinds and Varieties of Pear Trees cultivated in our Gardens; the Blossoms are white, and the Leaves a grass Green.
2. It is planted in Gardens, and flowers in April and May.
3. The Fruit is esteemed cooling and restraining. Dioscorides says it is very useful in Repelling Cataplasms; & recommends its Juice boiled as good to stop the Fluor Albus.
4. Greek, *Πῆρ*. Latin, *Pyrus sativa*. Spanish, *Peral*. Italian, *Pero*. French, *Poirier*. German, *Birn-Baum*. Dutch, *Peer-Boom*.

Plate 454. *Cinquefoil. Pentaphyllum.*

1. The Stalks grow about a Foot long; the Leaves are a bright grass Green, and the Flowers yellow.
2. It grows by Hedges, and Way-Sides, flowering all the Summer.
3. The Leaves and Roots are accounted drying and restraining, and good against all kinds of Fluxes and Haemorrhages. A Drachm of the Powder of the Roots, taken two or three times a Day, is said to cure the Ague; it is also accounted good in malignant Distempers, and is an Ingredient in the Venice Treacle. It is frequently used in Gargles for sore Mouths and ulcerated Gums, and to fasten loose Teeth.
4. Greek, *Πενταφύλλον*. Latin, *Quinquesfolium majus repens*. Spanish, *Cinco en rama*. Italian, *Cinquesfoglio*. French, *Quintefeuille*. German, *Fünff-finger kraut*. Dutch, *Dyf-vinger-kraid*.

Plate 455. *Nep^r or Catmint. Nepeta, vel. Mentha cataria.*

1. The Stalks grow about two Foot high, the Leaves are a grass Green, and the Flowers white.
2. It grows in Lanes and Hedges, and flowers in June and July.
3. It is esteemed warming and attenuating, and is of great service to open Obstructions of the Womb, and helping the green Sickness, as also the Suffocation of the Womb and Vapours; it is also good to promote the Birth and Cleansing; and by some Authors it is commended against Barrenness.
4. Greek, *Νεπῆτα*. Latin, *Mentha cataria, vulgaris et major*. Spanish, *Kierva gatera*. Italian, *Herba Gatta*. French, *Herbe au Chat*. German, *Gatzen-kraut*. Dutch, *Katte-kraid*.

Plate 456. *Poley-mountain. Potium montanum.*

1. The Stalks grow about a Foot high, the Leaves are a light woolly Green, and the Flowers whitish.
2. It grows in Italy & the Southern Parts of France, flowering in July.
3. The Tops and Heads are used, being accounted opening and attenuating good for Obstructions of the Liver and Spleen, helps the Dropsy and Jaundice; provokes Urine & the Menses, and is good against the Bites of Venemous Creatures. It is an Ingredient in the Theriaca Andromachi.
4. Greek, *Πόλιον*. Latin, *Potium maritimum, erectum, Monspeliacum*. Spanish, *Cien nudillos*. Italian, *Potio, e Poligono maschio*. French, *Renouée et Ive muscate*. German, *Mariencraut*. Dutch, *Bergh Potium*.

There is a great deal of talk about the
the future of the country, and it is
a matter of course that the people
will be interested in it. The
future of the country is a matter
of great importance, and it is
a matter of course that the people
will be interested in it.

Potium montanum.

Plate 457. *Black Briony. Bryonia nigra.*

1. The Stalks grow to a great length climbing upon any Thing they grow near to: like those of the white Briony (See Plate 37) except the Tendrils, for this has none, the Leaves are a deep grass Green, and the Flowers a pale Green.
2. It grows in Hedges and Lanes, flowering in May and June.
3. Some Authors ascribe a purging Quality to the Roots; but Hoffman and Doctor Lister, could not find any such Quality in them, altho' they tryed them several times. It is said to provoke Urine, and cleanse the Reins from Gravel; and a Cataplasme of the Root with Vinegar and Cow Dung is esteemed good for the Gout.
4. Greek, *Ἀμωέλ & μέλαινα*. Latin, *Bryonia laevis sive nigra racemosa*. Spanish, *Brionia negra*. Italian, *Brionia nera*. French, *Brioine noir*. German, *Stict-Burk*. Dutch, *Wilde Wyngaart*.

Plate 458. *Artichoke. Cinara, vel Scolymus.*

1. The Stalks grow about three Foot high, the Leaves are a light green & y^e Flowers blue.
2. It is planted here in Gardens and flowers in June and July.
3. Artichokes are esteem'd a pleasant wholesome, and very nourishing Food. The Roots are accounted apperative, cleansing and diuretic good to help the Jaundice and provoke Urine.
4. Greek, *Σκόλιμος*. Latin, *Cinara hortensis foliis aculeatis et non aculeatis*. Spanish, *Alcachosa*. Italian, *Articiocco*. French, *Artichaut*. German, *Strobildorn*. Dutch, *Artichocken*.

Plate 459. *Deadly-carrot. Thapsia.*

1. The Stalk grows about two Foot high, the Leaves are a deep grass Green, and the Flowers yellow.
2. It is a Native of Italy and Spain, flowering in July.
3. The Root is accounted of a poisonous Nature working upwards and downwards with great Violence; and was formerly sold in the Shops for the *Radix Turpethi*.
4. Greek, *Θαψία*. Latin, *Thapsia Carotae folio*. Spanish, *Turbino bastardo*. Italian, *Turbito fento*. French, *Turbit bastard*. German, *Bilde Turbit*. Dutch, *Wilde Turbit*.

Plate 460. *Buck's-horn-Plantain. Coronopus.*

1. The Stalks grow about six Inches long; (for this Plant is overgrown being gathered out of the Garden) the Leaves are a light grass Green, and the Flowers a pale Green.
2. It grows in Sandy Ground and on Heaths flowering in June.
3. This Plantain is much of the Nature of the others, (see Plate 14 & Plate 35) being moderately drying and binding, and a good Wound Herb, either taken inwardly or applied outwardly; besides which it is particularly commend- ed against the Bitings of all kinds of Venemous Creatures; and more especially for the Bite of a mad Dog.
4. Greek, *Κοροσωπος*. Latin, *Coronopus sylvestris hirsutior*. Spanish, *Gujabelha*. Italian, *Herba stella*. French, *Corn de Cerf ou Sanguinaire*. German, *Grayen-fuss*. Dutch, *Heris-hoorn*.

[Faint, illegible handwriting visible through the paper.]

Plate 461. *Pistachio. Pistachia.*

1. This grows to be a large Tree in its Native soil; the Leaves are a light Green and the Flowers white.
2. It grows in the Eastern Parts of Persia and Turkey.
3. The Fruit is esteemed nourishing and restorative, and good for weak Consumptive People, opening Obstructions of the Liver and Spleen. Matthiolus says they are a Provocative to Venery.
4. Greek, Πιστία. Latin, *Pistacia peregrina, fructu racemoso; sive Terebinthus Indica* Theophrasto. Spanish, Pistacho. Italian, Pistacchia. French, Pistachier. German, Pimper-nuss-baum. Dutch, Pistassi-boom.

Plate 462. *Dittany of Creet. Dictamnus Creticus.*

1. The Stalks grow about a Foot high, the Leaves are a pale Green covered with Wool, except those on the young Stalks next the Top, which have no Wool: & the Flowers are a light Purple.
2. It grows chiefly in the Island of Creet or Candy, & flowers in June.
3. This Plant was had in great Esteem among the Ancients, particularly Virgil, for its reputed Virtue of expelling the Arrows from wounded Bodies. It is still accounted alexipharmic, resisting Poison and all contagious pestilential Diseases; and is esteemed good for the Bites or Stings of Venemous Creatures. It is of great Use to accelerate the Birth, expelling the Secundines and procuring the Catamenia. There is a good Quantity of it put into the Venice-Treacle, Mithridate and Diacordium. The Leaves are the only Part used.
4. Greek, ΔΙΚΤΑΜΝΟΣ. Latin, *Dictamnus Creticus*. Spanish, Dictamo. Italian, Dittamo di Candia. French, Dictame. German, Bilder-Pölly. Dutch, Dictamnus van Candie.

Plate 463. *Bill-berry. Vaccinia.*

1. This Bush grows about a Foot high, the Leaves are a bright grass Green, and the Flowers a red Purple.
2. It grows on Heaths and in thin woody Places, in a boggy Soil, and generally among Ferns, flowering in May.
3. The Fruit is cooling, binding and grateful to the Stomach, and good for Fluxes and Haemorrhagies. Symon Paul says they are much used against the Scurvy in Norway and other Northern Countries. An agreeable Syrup may be made of its Juice, and used for all the above Intentions.
4. Greek, Χαμαμύρσιον. Latin, *Myrtillus, & Vitis Idaea, foliis oblongis crenatis, fructu nigricante*. Spanish, Mirto agreste. Italian, Mirtillo. French, Airelle, ou Miraille. German, Heidelbeer. Dutch, Myrtill.

Plate 464. *Tansie. Tanacetum.*

1. The Stalks grow about two Foot high, the Leaves are a grass Green, & the Flowers yellow.
2. It grows wild by Road-Sides, and the Borders of Fields, flowering in July.
3. The Leaves are accounted warming and apperative, good for Obstructions of the Liver and Spleen, and of great Use in the Jaundice. They also provoke Urine & the Catamenia, yet the ignorant Midwives often give a Syrup of the Juice to prevent Miscarriage. The Flowers are esteemed good to destroy Worms in Children.
4. Greek, Tanaisi. Latin, *Tanacetum*. Spanish, Tanaisi. German, Rein-farn. Dutch, Worm-kraid. Italian, Tanaceto. French, Tanaisi.

Plate 465. *Meadow-sweet. Ulmaria.*

1. The Stalks grow about three Foot high; the Leaves are a bright Green above, and hoary underneath, and the Flowers a cream Colour.
2. It grows in moist Meadows, and by River-sides, flowering in June.
3. The Leaves & Tops are accounted alexipharmic & sudorific, and good in Fevers and all malignant Distempers; they are also restraining and binding, and usefull in all kinds of Fluxes. They are an Ingredient in the Aqua lactis. The Official Preparation is *Aqua Ulmariae*.
4. Greek, *Latin, Barba Caprae floribus compactis, & Regina Prati. Spanish, Regna de los Prados. Italian, Regina di Prato. French, Reine des Pres. German, Veis-hart. Dutch, Reinette.*

Plate 466. *The True Acorus. Acorus verus.*

1. The Stalks grow about two Foot high, the Leaves are a light grass Green, and the Juli a light greenish Brown.
2. It grows in Rivulets, particularly in Surry, Cheshire and Norwich, and shoots forth its Catkins in July and August.
3. The Roots are esteem'd hot, dry, opening and attenuating, and good for Obstructions of Liver and Spleen; they provoke Urine and the Menstrues, help the Colick, resist Putrefaction, are useful against pestilential Contagions, and corrupt noxious Air; and are outwardly used in Sweet Bags & Perfumes. They are an Ingredient in *Theriaca & Mithridate*.
4. Greek, *A'kogov. Latin, Calamus aromaticus. Spanish, Acoro. Italian, Acoro. French, Acorus. German, Kalmus. Dutch, Calmoes.*

Plate 467. *Dropwort. Filipendula.*

1. The Stalks grow about a Foot high, the Leaves are a deep grass Green, and the Flowers white within and red on the outside.
2. It grows in Chalky Grounds, and flowers in June and July.
3. The Leaves and the Roots, but especially the last are accounted diuretic, and good for the Stone, Gravel, and stoppage of Urine. The Powder is commended by M^r Ray, from Doctor Needham and Simon Paul, to stop violent Floodings and the Whites; tho Parkinson says it was used in his time to expell the Secundines. Provatius commends it against the Bloody Flux; from his own Experience.
4. Greek, *Latin, Filipendula vulgaris. Spanish, Filipendula. Italian, Filipendula. French, Filipendule. German, Rother stein-brech. Dutch, Roode steen-breke.*

Plate 468. *Distaff-Thistle. Atractylis.*

1. The Stalks grow about three Foot high, the Leaves are a bright grass Green, & Flowers yellow.
2. It grows in Italy & Greece, where Women use the Stalks for Distaffs; & flowers in June.
3. Doctor Boerhave thought that this Plant had the same Virtues with the *Carduus benedictus*. (see Plate 476) and esteem'd it good to Purge, Vomit, provoke Urine, or Sweat, according to the Quantity that was taken. Those who have a mind to know what he says at large upon it, may consult his *Historia Plant. quae in Hore. Acad. Lug. Bat. crescunt* Pag. 200.
4. Greek, *A'gákrυdis. Latin, Atractylis lutea. Spanish, Azafran romin & Carthamo. Italian, Cartamo salvatico. French, Safran batard. German, Feld-Saffran. Dutch, Bastert Saffraan.*

1891
The first of the year was a very dry one
and the crops were much injured by the
drought. The wheat was particularly
suffered and the yield was very small.
The corn was also much injured and
the yield was very small. The
cattle and sheep were also much
suffered and the loss was very
great.

The second of the year was a very
wet one and the crops were much
injured by the rain. The wheat was
particularly suffered and the yield
was very small. The corn was also
much injured and the yield was very
small. The cattle and sheep were also
much suffered and the loss was very
great.

Plate 469. *The Lime-tree. Tilia.*

1. This grows to be a tall Tree, the Leaves are a bright grass Green, and the Flowers yellowish.
2. It is planted in Parks & about Gentlemens Seats, flowering in June and July.
3. The Flowers are accounted cephalic and nervine, and good for the Apoplexy, Epilepsy, Vertigo, and Palpitation of the Heart. They are used in the Aqua Peon. Comp. and the Spiritus Lavendulae. The Aqua Florum Tiliae takes its name from them.
4. Greek, Φιλύρα. Latin, *Tilia fremina, folio majore*. Spanish, Tazo, & Lino. Italian, *Tilia*. French, Tilleul, ou Tilet. German, Linden. Dutch, Lindeboom.

Plate 470. *Black Masterwort. Atrantia nigra.*

1. The Stalks grow about two Foot high, the Leaves are a dark Green, & the Flowers are a whitish light Green tinged with Purple.
2. It grows here in Gardens, and flowers in July and August.
3. Conradus Gernerus, says that this *Atrantia* has as great a purging Quality as the white Hellebore (see Plate 74.) and commends it as good to purge Melancholy and other Humors.
4. Greek, *Atrantia Alpina*. Latin, *Atrantia Alpina*. Spanish, *Verdegambre alpino*. Italian, *Imperatoria nera*. French, *Imperatoire noir*. German, *Bergstrent*. Dutch, *Meesternortel*.

Plate 471. *Daucus of Creet. Daucus Creticus.*

1. The Stalks grow about two Foot high, the Leaves are a deep grass Green, and the Flowers white.
2. It is a Native of Candy, & other Places of the Levant, and flowers in June & July.
3. The Seeds only are used, and are esteem'd warming and aperative good in Disorders of the Kidneys, as the Stone or Strangury, provoking Urine & Hæmaturia. They expediate the Birth, and bring away the After-Birth. They are also accounted alexipharmic, and good against the Bites and Stings of venomous Creatures. They are used in the Theriaca and Mithridate.
4. Greek, *Daucus folius Foeniculi tenuissimis*. Latin, *Daucus folius Foeniculi tenuissimis*. Spanish, *Chiribia de Candia*. Italian, *Dauco di Candia*. French, *Carote sauvage ou Panais de Candie*. German, *Mohrenkummel*. Dutch, *Kroontjes kruid*.

Plate 472. *Burnet-saxifrage. Pimpinella saxifraga.*

1. The Stalks grow about three Foot high, the Leaves are a grass Green, and the Flowers white.
2. It grows in several Parts of Kent in great Plenty, and flowers in June.
3. The Roots are accounted hot, dry and carminative, good to expell Wind, ease the Colic, and strengthen the Stomach. They are also diuretic, and useful against the Stone, Gravel and Scurvey, and are put in the Pulvis Ari. comp.
4. Greek, Πιμπινέλλα. Latin, *Pimpinella saxifraga major umbella candida*. Spanish, *La Mas Pimpinela*. Italian, *Pimpinella maggiore*. French, *Pimpinelle gras*. German, *Bibernell*. Dutch, *Pimpernelle*.

Plate 473. *Elecampane. Helenium.*

1. The Stalks grow about four or five Foot high, the Leaves are a grass Green, and the Flowers yellow.
2. It grows in moist Fields and Meadows, in several Parts here, but is often planted in Gardens, and flowers in July.
3. The Roots are esteem'd pneumonic, carminative, sudorific and alexipharmic, of great service in Shortness of Breath, Coughs, stuffing of the Lungs, and in infectious and contagious Distempers. They are also good for the Gout & Sciatica, the Stone and stoppage of Urine, and provoke the menstrual Flux, for which they are frequently mixed with Chalibeats. Outwardly they are used for the Itch, either the Juice or Powder mixed with a proper Ointment. Official Preparations are the Unguentum Enulatum cum et sine Mercurio.
4. Greek, Ἐλεκαμπάνη. Latin, Enula Campana. Spanish, Ala. Italian, Enola. French, Herbe d'Elaune. German, Alankwurt. Dutch, Alant-wortel.

Plate 474. *Bog-bean. Trifolium palustre.*

1. The Stalks grow about two Foot high, that bear the Flowers, the Leaves are a yellow Green, and the Flowers a whitish Purple.
2. It grows in marshy boggy Grounds, and flowers in May.
3. This Plant is esteemed a great antiscorbutic, and very serviceable for the Gout, Rheumatism and Dropsy, for which Distempers it is much used in Diet Drinks. It is also a good stomatick, and is taken often in Intermitting Fevers.
4. Greek Μιννάρδε's. Latin, Trifolium paludosum, et Menyanthes. Spanish, Trebol o Nielga Lagunosa. Italian, Trifoglio paludoso. French, Trifolio ou Trefet des mairais. German, Spickdee. Dutch, Seven Betydenkrayd.

Plate 475. *Scordium or Water-Germander. Scordium.*

1. The Stalks grow about a Foot high, the Leaves are a deep grass Green, and the Flowers a light Purple.
2. It grows in marshy Places, especially in the Isle of Ely, and flowers in July.
3. The Leaves are accounted sudorific & alexipharmic, and a good Preservative & Remedy against all malignant and pestilential Diseases & putrid Fevers. They also resist Putrefaction, destroy Worms & are good against the Bites of all Venemous Creatures: They are used in Venice Treacle & Mithridate, and Diascordium takes its Name from this Plant.
4. Greek, Σκόρδιον. Latin, Scordium. Spanish, Scordio. Italian, Scordio. French, Scordium, ou Chammaraz. German, Wasser-bachnig. Dutch, Water-loek.

Plate 476. *Carduus, or the Blessed Thistle. Carduus benedictus.*

1. The Stalks grow about three Foot high, the Leaves are a light grass Green, and the Flowers yellow.
2. It is sown every Year in Gardens, flowering in June.
3. This Plant takes its Name from the wholesome Qualities said to be in it, being accounted cordial & sudorific, and good for all sorts of malignant and pestilential Fevers, and for Agues of all kinds. It destroys Worms in the Stomach and is good against all Sorts of Poison. The Decoction of it in Water or Possit-Drink is much used as a Vomit. It is an Ingredient in the Treacle Water. The Official Preparation is, the Aqua Cardui.
4. Greek, Κρίκος. Latin, Crucis sylvestris hirsutior, sive Carduus benedictus. Spanish, Cardo bendito. Italian, Cardo benedetto. French, Chardon benit. German, Cardo-benedict. Dutch, Besegende Distel.

1844

1. The first of the year was a very cold one, and the weather was very disagreeable. The snow was very deep, and the wind was very strong. The people were very much distressed, and the cattle were very much starved.

2. The second of the year was a very warm one, and the weather was very pleasant. The snow was very much melted, and the wind was very gentle. The people were very much pleased, and the cattle were very much fattened.

3. The third of the year was a very cold one, and the weather was very disagreeable. The snow was very deep, and the wind was very strong. The people were very much distressed, and the cattle were very much starved.

4. The fourth of the year was a very warm one, and the weather was very pleasant. The snow was very much melted, and the wind was very gentle. The people were very much pleased, and the cattle were very much fattened.

5. The fifth of the year was a very cold one, and the weather was very disagreeable. The snow was very deep, and the wind was very strong. The people were very much distressed, and the cattle were very much starved.

6. The sixth of the year was a very warm one, and the weather was very pleasant. The snow was very much melted, and the wind was very gentle. The people were very much pleased, and the cattle were very much fattened.

7. The seventh of the year was a very cold one, and the weather was very disagreeable. The snow was very deep, and the wind was very strong. The people were very much distressed, and the cattle were very much starved.

8. The eighth of the year was a very warm one, and the weather was very pleasant. The snow was very much melted, and the wind was very gentle. The people were very much pleased, and the cattle were very much fattened.

9. The ninth of the year was a very cold one, and the weather was very disagreeable. The snow was very deep, and the wind was very strong. The people were very much distressed, and the cattle were very much starved.

10. The tenth of the year was a very warm one, and the weather was very pleasant. The snow was very much melted, and the wind was very gentle. The people were very much pleased, and the cattle were very much fattened.

Plate 477. *The Larch-Tree. Larix.*

1. This grows to be a tall Tree in its Native Soil; the Leaves are a bright grass Green, and the Catkins red.
2. It grows in the Stirian Alps, and the Mountains of Tirol and Carinthia; and sends forth its Catkins in March and April.
3. From the Trunk of this Tree the Venice Turpentine came which was formerly much used in the Shops, being of a browner Colour, and thicker than *g. Strasburg*, and of a more resinous Smell; but what goes under that Name now, is generally brought from New-england. Turpentine is heating, mollifying, and cleansing, good to stop a Gonorrhoea and the Fluor Albus. It likewise provokes Urine, cleanses the Lungs, and is of great service outwardly in Ointments and Plaisters. Official Preparations are the Oleum and Balsamum Terebinthi.
4. Greek, Λάριξ. Latin, Larix. Spanish, Tea. Italian, Larice. French, Meloze. German, Lerchenbaum. Dutch, Lorkenboom.

Plate 478. *The Turpentine-Tree. Terebinthus.*

1. This grows to be a large Tree in the Eastern Countries; the Leaves are a bright grass Green, and the Flowers purple.
2. It grows in the Island of Chio, from whence we have the best Turpentine, and flowers in April.
3. The Liquid Rosin of this Tree was prefer'd by the Ancients to all other Kinds, now call'd Turpentine, for Affections of the Breast & Lungs, and for Diseases of *g. Kidneys* or Bladder, as Stone, Gravel and stoppage of Urine. It is frequently used for the Fluor Albus and Gonorrhoea.
4. Greek, Τέρενθος. Latin, Terebinthus vulgaris. Spanish, Cornicabra. Italian, Terebinto. French, Terebinte. German, Terpentinbaum. Dutch, Terpent

Plate 479. *White Horehound. Marrubium album.*

1. The Stalks grow about a Foot high, the Leaves are a light Green, and the Flowers white.
2. It grows by Road-sides and in Lanes, and flowers in June.
3. The Leaves and Tops are accounted hot, dry, and pectoral, and good to free the Lungs from tough viscid Phlegm, especially in cold moist Constitutions, the Juice being made into a Syrup with Sugar or Honey. They also open Obstructions of the Liver & Spleen, and are very serviceable against the Dropsy, Jaundice, Green Sickness, Obstructions of the Catamenia, suppression of the Lochia, & other Distempers of the female Sex; for which few Herbs go beyond it. The Official Preparation is the Syrupus de Praesio.
4. Greek, Μαρρόιον. Latin, Praesium. Spanish, Marrubio. Italian, Marrobio. French, Marrubium, ou Marrube blanc. German, Weißer Andorn. Dutch, Andorn Mabron.

Plate 480. *Herb Robert. Geranium Robertianum.*

1. The Stalks grow about two Foot high, the Leaves are a deep grass Green, and the Flowers a reddish Purple.
2. It grows in Hedges & shady Banks, and flowers for most Months in the Summer.
3. This is much of the Nature of Doves-Foot (see Plate 58) being drying & binding, & useful in Wounds & Bruises, as well as in Fluxes. It is particularly commended for *g. Kings-Evil*, and all scrophulous Swellings, and has done great Service in Nephritic Cases.
4. Greek, Τεράριον. Latin, Gratia Dei. Spanish, Hierba de Roberto. Italian, Erbe di Ruberto. French, Herbe Robert. German, Roth-laufs-craut. Dutch, Robbreget-kruid.

Geranium Robertianum.

The first thing I noticed when I stepped
out of the car was a warm, humid breeze.
It felt like a giant hand reaching out to
greet me. The air was thick with the scent
of tropical flowers and the distant
hum of a plane. I took a deep breath,
savoring the moment. This was it. My
first experience in a new world.

I walked towards the beach, my feet
sinking into the soft sand. The ocean
was a vibrant blue, stretching out to
the horizon. Waves crashed against the
shore, creating a rhythmic pattern of
white foam. I stood there for a while,
watching the sun dip below the water.
The sky was a mix of orange and pink,
reflecting the light of the setting sun.

As the sun disappeared, the temperature
dropped slightly, but the humidity remained.
I felt a sense of peace and tranquility.
This was a place where time seemed to
stand still. I closed my eyes and
listened to the sounds of nature. The
gentle lapping of waves, the distant
crying of a seagull, and the soft rustle
of palm leaves. It was a symphony of
life.

I opened my eyes and looked out at the
ocean. The water was still, reflecting the
last rays of the sun. I felt a deep
connection to this place. It was as if
I had found a hidden gem. I smiled
and turned back towards the car. I
would be staying here for a while.
This was my new home.

Plate 481. *Sea Lavender. Limonium & Behen rubrum.*

1. The Stalks grow about a Foot high, the Leaves are a grass Green, and the Flower Purple.
2. It grows commonly in Salt Marshes, as below Greenhish, and Gravesend in very great Plenty and flowers in July and August.
3. The Roots and Seed are esteem'd restraining & binding; and good for a Diarrhea, Dysentery, the too great Abundance of the Menstrua and the Fluor Albus.
4. Greek, Λειμώδιον. Latin, *Limonium maritimum majus*. Spanish, Espliego de Mar. Italian, Lavanda di Mare. French, Lavande de Mer. German, Dutch, Limoen-kruyd.

Plate 482. *Black Poppy. Papaver nigrum.*

1. The Stalk grows about three Foot high, the Leaves are a willow Green, and the Flowers a pale Purple with a black Bottom.
2. It is sown yearly in Gardens, and flowers in July.
3. The Heads were formerly used in the Symplicium c. Meconio, but are left out in the last Edition of the Dispensatory. The Leaves are used in Cooling Ointments, being accounted good for Burns, Inflammations, and hot Swellings; and are put in the Unguentum Populeon.
4. Greek, Μήκων, μέλας. Latin, *Papaver hortense nigro semine*. Spanish, Dormidera negra. Italian, Papavero nero. French, Pavot noir. German, Schwarzer Magsamen. Dutch, Swarte Heul.

Plate 483. *White Poppy. Papaver album.*

1. The Stalks grow about six Foot high, the Leaves are a pale Green, and the Flowers white.
2. It is sown in Fields and Gardens, and flowers in June.
3. From the Heads of these Poppies (in Turkey) the Opium of our Shops is produced; by making Incisions into them, the milky Juice which comes from the Wounds, is soon thickened by the Heat of the Sun, and then gathered and made up into Lumps. Opium is the greatest Anodine we have, easing Pain, procuring Sleep, stopping all violent Evacuations; and is an excellent Medicine in the Hands of a Wise Man; and ought never to be prescribed by any other; many fatal Accidents ensuing from the immoderate or unseasonable Use of it. The Symplicium c. Meconio or Diacodium is made of the Poppy Heads dried, infused & boiled in Water. The Seeds are much used in Emulsions being cooling and good in Fevers, inflammatory Distempers, the Strangury and Heat of Urine.
4. Greek, Μήκων λευκόν. Latin, *Papaver hortense semine albo*. Spanish, Dormidera blanca. Italian, Papavero bianco. French, Pavot blanc. German, Weiss Magsamen. Dutch, Witte Heul.

Plate 484. *The Lesser Valerian. Valeriana minor.*

1. The Stalks grow about a Foot high, the Leaves are a grass Green, and the Flowers a pale Purple.
2. It grows in Marshy Grounds & moist Meadows, and flowers in May.
3. Matthioli gives much the same Virtues to this Valerian as he does to the other Valerians, only in a less Degree (see Plate 250. & Plate 271.) but this Species is rarely used in the Shops now, the other being esteemed much better.
4. Greek, Ρόδον μικρόν. Latin, *Valeriana palustris minor*. Spanish, Yerva benedicta menor. Italian, Valeriana minima. French, Valerienne petit. German, Gleini Balibrian. Dutch, Daleriana.

Plate 485. *Liquid Amber. Liquidamber.*

1. Monardus says that this grows to be a large Tree in its Native Climate, the Leaves are a grass Green, and the Bark of the Trunk ash Colour; in which they make Incisions, and the Resinous Gum, that flows from the Wounds, is the Liquid Amber of the Shops.
 2. It grows in several Parts of the West Indies.
 3. It is esteemed of a heating resolving Nature, good to open Obstructions, and help the Hardness of the Womb.
 4. Greek, *Λαυδάμυρα*. Latin, *Liquidambra*. Spanish, *Liquidambar*. Italian, *Liquid*
ambra. French, *Liquidambar*. German, *Liquidambar*. Dutch, *Liquidambar*.
-

Plate 486. *Sumach. Rhus Obsoniorum.*

1. This seldom grows to be a tall Tree; the Leaves are a bluish dark Green on the Face, and a light willow Green on the Back, & the Flowers a whitish Yellow.
 2. It grows in Italy, Spain and Turkey, and flowers in May and June.
 3. The Leaves and Seed are accounted restraining and Stiptic, and good for all Fluxes and Haemorrhagies; both used inwardly and outwardly. They are also good to resist Putrefactions and stop Gangreens and Mortifications. They are used in the Symplic Myrtinus.
 4. Greek, *Ρόυς*. Latin, *Sumach*. Spanish, *Sumagre*. Italian, *Somacho*. French, *Sumac*. German, *Gerberbaum*. Dutch, *Smack*.
-

Plate 487. *The Oak. Quercus.*

1. This grows to be a very tall Tree, the Leaves are a bright grass Green, and the Fruit a brownish Green when ripe.
 2. It grows in great plenty in this Country, and its Acorns are ripe in September.
 3. The Bark, Buds, Acorns, Cups, and Galls are used; and are accounted Stiptic and binding, and useful in all kinds of Fluxes and Bleedings, either Inward or outward. The Bark is often used for the Relaxation of the Urula, & for sore Mouths and Throats; and is put in restraining Glysters & Injections against the Prolapsus Uteri or Ani. The Vulgar frequently beat the Acorns to Powder, and take it for Pains in the Side. The Official Preparation is, the Aqua Germinum Quercus.
 4. Greek, *Δρυς*. Latin, *Quercus latifolia foemina*. Spanish, *Robre*. Italian, *Quercia*. French, *Chesne*. German, *Eychbaum*. Dutch, *Eyken-Boom*.
-

Plate 488. *Dwarf-Elder. Ebulus.*

1. It grows about four Foot high, the Leaves are a light Green, & the Flowers white, with a little Dash of Purple.
2. It grows near Motes and in Hedges; and flowers in May.
3. This is much of the Nature of common Elder (see Plate 151) being good to purge serous watery Humors by Stool, and is therefore good for Dropsy and other Distempers arising from a Glut of Serum. It is also useful in Gouty scorbutic Humors, both given inwardly, and applied outwardly, boiled in a Lixivium.
4. Greek, *Καταιάκτις*. Latin, *Chamaeacte*. Spanish, *Hiezguas ó Subugo-pequenno*. Italian, *Ebulo ó Nebbio*. French, *Hieble*. German, *Niederholter*. Dutch, *Wilde Olier*.

Plate 489. *Patience. Lapathum sativum. et Patientia.*

1. The Stalks grow about six Foot high, the Leaves are a grass Green, and the Flowers yellow.
2. It is planted here in Gardens, and flowers in July.
3. The Root is opening and purging, being somewhat of the Nature of the true Rhubarb, but not so strong; and is often used in Diet-Drinks for the Scurvy, and to open Obstructions of the Liver & Spleen, and help the Jaundice.
4. Greek, *Ἰσθαλάωθρον*. Latin, *Lapathum hortense*. Spanish, *Acadera cevada*. Italian, *Rombice maggiore*. French, *Patience*. German, *Munch Rhabarbaren*. Dutch, *Patientie*.

Plate 490. *The great Water Dock. Lapathum aquaticum.*

1. The Stalks grow about five Foot high, the Leaves are a grass Green, and the Flowers yellow.
2. It grows in Ponds and Ditches, flowering in July.
3. There is a particular Treatise wrote on this Plant, by *Muntingius*, who supposes it to be the *Britanica* of the Ancients, and attributes to it all the Virtues that they ascribe to their *Britanica*; as being of great Service against the Scurvy & all its Symptoms, as Ulcers in the Mouth and Gums, Looseness of Teeth, Pains in the Limbs, as likewise against all kinds of Fluxes, the Dropsy and Jaundice.
4. Greek, *Υδρολάωθρον*. Latin, *Hydrolapathum*. Spanish, *Acadera agatila*. Italian, *Lapatio aquatico*. French, *Lapais aquatique*. German, *Mengermurt*. Dutch, *Water Patich*.

Plate 491. *Sharp-pointed Dock. Lapathum acutum.*

1. The Stalks grow about three Foot high, the Leaves are a grass Green, and the Flowers a greenish Yellow.
2. It grows common in moist Places, and flowers in June.
3. The Roots are accounted operative & cooling, and much used to purify and cleanse the Blood from salt sharp Humours; and are good for the Scurvy, Rheumatism, and all manner of itchy scabby Eruptions, for which Purpose they are frequently put in Diet-Drinks & apozems, and used outwardly in Ointments. The Seed is drying and binding, good to stop spitting of Blood, and Haemorrhagies of all Kinds.
4. Greek, *Οξυλάωθρον*. Latin, *Oxylapathum*. Spanish, *Labara*. Italian, *Lapatio*. French, *Lapais, ou Pareile*. German, *Stroiffwart*. Dutch, *Wilde Patich*.

Plate 492. *Bloodwort. Lapathum sanguineum.*

1. The Stalks grow about three Foot high, the Leaves are a grass Green, veined with Red, and the Flowers a pale Green.
2. It is planted in Gardens, and flowers in June.
3. *Matthioli*, says this has the same Qualities as the Sharp-pointed Dock; only he prefers it to the former in all sorts of Fluxes & Haemorrhagies.
4. Greek, *Ερυθρόλάωθρον*. Latin, *Lapathum folio acuto rubente*. Spanish, *Labara roxa*. Italian, *Lapatio rosso*. French, *Lapais rouge*. German, *Drachenblut*. Dutch, *Bloedkruid*.

Plate 493. *Logwood. Lignum Campechianum.*

1. This grows to be a large Tree in its Native Climate, the Leaves are a dark grass Green, and the Flowers a pale Purple.
 2. It grows in the Island of Campeachy in great Plenty.
 3. The Extract of this Wood is lately found to be very helpfull in Fluxes of the Belly.
 4. Greek, *Λαυρον Καμπεκιανον*. Latin, *Lignum Campechianum*. Spanish, *Palo de Campeche*. Italian, *Legna di Campeche*. French, *Bois de Campeche*. German, *Campecheholz*. Dutch, *Campechehout*.
-

Plate 494. *The Sloe-tree. Prunus sylvestris.*

1. It grows to be eight or ten Foot high, the Leaves are a deep grass Green and the Flowers white.
 2. It grows common in Hedges, and flowers in March.
 3. The Fruit is esteemed restraining and binding, good for all kinds of Fluxes and Haemorrhagies. It is of great service in Gargarisms for sore Mouths and Gums; and good to fasten loose Teeth. The Juice of the Sloes, boiled to a Consistence is what is now used for the true *Acacia Germanica* of the Shops.
 4. Greek, *Κοκκύμυλος ἄγρια*. Latin, *Prunus sylvestris*. Spanish, *Ciruelo silvestre*. Italian, *Prugnole salvatiche*. French, *Prunier sauvage*. German, *Schiehendorn*. Dutch, *Wilde Pruym Boom*.
-

Plate 495. *Liquorice. Glycyrrhiza.*

1. The Stalks grow about three Foot high, the Leaves are a light grass Green, and the Flowers a pale Purple.
 2. It is planted in Fields and Gardens, and flowers in June.
 3. The Roots are pectoral, and of great Use in Distempers of the Lungs as Coughs and shortness of Breath; and likewise in nephritic Affections, as Stone, Gravel, stoppage & Heat of Urine, and Ulcers in the Kidneys.
 4. Greek, *Γλυκυρρίζα*. Latin, *Liquiritia*. Spanish, *Regaliza*. Italian, *Regolitia*. French, *Regalisse*. German, *Lectric*. Dutch, *Soethout*.
-

Plate 496. *Angelica. Angelica.*

1. The Stalks grow about five Foot high, the Leaves are a light grass Green, and the Flowers white.
2. It is planted in Gardens flowering in June.
3. It is accounted Stomachic, cordial & alexipharmic; and of great Use in all malignant pestilential Fevers, & all contagious Distempers even the Plague it self. It causes Sweat, & drives out all noxious Humors through the Pores of the Skin. It is very serviceable in Disorders of the Womb & Hysterical Affections; it provokes Urine and the Catamenia, & expels the Secundines. The Roots Stalks & Leaves are used. The Official Preparations are a Simple & Compound Water, and the Stalks candied.
4. Greek, *Ἄγγελικα*. Latin, *Angelica sativa*. Spanish, *Angelica*. Italian, *Angelica*. French, *Angelique*. German, *Angelick*. Dutch, *Tamme Angelica*.

Plate 497. *The Yellow Water-Lilly. Nymphaea lutea.*

1. The Stalks on which the Flowers grow are about three Foot long, the Leaves are a grass Green, and the Flowers yellow.
 2. It grows in Rivers and large Lakes, flowering in June and July.
 3. It is accounted cooling and anodyne, and good in dilerious Fevers, and for the Heat and Sharpness of Urine, and all kinds of Fluxes and Loosnesses.
 4. Greek, Νυμφαία ἑρέγα. Latin, *Nymphaea major lutea*. Spanish, Lirio amarillo del Rio. Italian, *Nimphaea gialla*. French, Lis jaune de Stagn. German, Blß Seeblumen. Dutch, Plompen.
-

Plate 498. *The White Water-Lilly. Nymphaea alba.*

1. The Stalks grow about three Foot long, the Leaves are a grass Green, and the Flowers white.
 2. It grows in Rivers, and flowers in June and July.
 3. The Root and Flowers are esteem'd cooling and drying, and good to stop all kinds of Fluxes, a Gonorrhæa and nocturnal Pollutions, by their softning cooling Qualities, allaying the Acrimony of the Seed, and thereby rendering Persons less enclined to Venery. The Leaves are good to be applyed to hot Tumors and Inflammations.
 4. Greek, Νυμφαία. Latin, *Nenuphar*. Spanish, Lirio blanco del Rio. Italian, *Nimphaea bianco*. French, Lis blanc d'Eau. German, Weiss Seeblumen. Dutch, Witte Plompen.
-

Plate 499. *Water-Lilly Roots. Nymphaea Radices.*

1. The Root of the Yellow Water Lilly is about ten or twelve Inches in Circumference, and full of Fibers, which stick very deep in the Ground. Both the outside and inside are of a whitish Colour.
 2. The Root of the White Water Lilly grows bigger than that of the yellow, but has fewer Fibers, and grows deep in the Ground. The outside of the Root is a deep Black, and the inside is White.
-

Plate 500. *Bugloss. Buglossum.*

1. The Stalks grow about three Foot high, the Leaves are a bright grass Green, and the Flowers a red Purple when young, and a deep Blue when they are blown two or three Days.
2. It is planted in Gardens and flowers in June and July.
3. This Plant is much of the Nature of Borrage (see Plate 36) being accounted cordial, and good to exhilarate the Spirits and drive away Melancholy, and is useful against Hypochondriac and Hysterick Disorders. The Flowers are one of the Four cordial Flowers.
4. Greek, Βούγλωσσον. Latin, *Buglossum angustifolium majus*. Spanish, Buglosa. Italian, Buglossa. French, Buglose. German, Ochsentunge. Dutch, Osse-tong.

Table with 4 columns and 20 rows. The columns are labeled: "Date", "Description", "Amount", and "Balance". The table contains handwritten entries in cursive script, including dates, descriptions of transactions, and numerical amounts. The text is faint and difficult to read due to the quality of the scan.
